K. Patell, Deborah Lindsay Williams, 2024-03-05 The Oxford History of the Novel in English is a twelve volume series presenting a comprehensive global and up to date history of English language prose fiction written by a large international team of scholars The series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements and tendencies This book offers an account of US fiction during a period demarcated by two traumatic moments the eve of the entry of the United States into the Second World War and the onset of the Covid 19 pandemic The aftermath of the Second World War was arguably the high point of US nationalism but in the years that followed US writers would increasingly explore the possibility that US democracy was a failure both at home and abroad For so many of the writers whose work this volume explores the idea of nation became suspect as did the idea of national literature as the foundation for US writing Looking at post 1940s writing the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved During this period the novel has had significant competition for the US public's attention from other forms of narrative and media film television comic books videogames and the internet and the various forms of social media that it spawned If however the novel becomes a residual form during this period it is by no means archaic The novel has been reinvigorated over the past eighty years by its encounters with both emergent forms such as film television comic books and digital media and the emergent voices typically associated with multiculturalism in the United States [The Cambridge Companion to English Literature, 1830-1914](#) Joanne Shattock, 2010-01-28 The nineteenth century witnessed unprecedented expansion in the reading public and an explosive growth in the number of books and newspapers produced to meet its demands These specially commissioned essays examine not only the full range and variety of texts that entertained and informed the Victorians but also the boundaries of Victorian literature the links and overlap with Romanticism in the 1830s and the roots of modernism in the years leading up to the First World War The Companion demonstrates how science medicine and theology influenced creative writing and emphasizes the importance of the visual in painting book illustration and in technological innovations from the kaleidoscope to the cinema Essays also chart the complex and fruitful interchanges with writers in America Europe and the Empire highlighting the geographical expansion of literature in English This Companion brings together the most important aspects of this prolific and popular period of English

Political Liberalism and the Rise of American Romanticism Scott M. Reznick, 2024-07-18 *Political Liberalism and the Rise of American Romanticism* explores how American Romanticism developed in response to pervasive conflicts over democracy s moral dimensions in the early republic and antebellum eras By recovering the long under examined tradition of political liberalism for literary studies it traces how US writers reacted to ongoing moral and political conflict by engaging with liberal thinkers and ideas as they endeavored to understand how individuals beholden to a divergent array of moral convictions might nevertheless share a stable and just political world the very dilemma at the core of political liberalism This study demonstrates how those philosophical engagements sparked Romanticism s rise and eventual flourishing as US writers increasingly embraced

Romantic literary modes emphasizing the imagination's capacity for creative synthesis and the role it plays in shoring up the habits of mind and feeling that are vital to a meaningful democratic culture. It offers revisionary readings of works by Charles Brockden Brown, Robert Montgomery Bird, James Fenimore Cooper, Harriet Beecher Stowe, Frederick Douglass, and Nathaniel Hawthorne to show how these Romantic writers were preoccupied with how individuals come to embrace their deepest convictions and what happens when they encounter others who see the world differently.
