Playing

Oppression Mary Flanagan, Mikael Jakobsson, 2023-02-28 A striking analysis of popular board games roots in imperialist

reasoning and why the future of play depends on reckoning with it Board games conjure up images of innocuously enriching entertainment family game nights childhood pastimes cooperative board games centered around resource management and strategic play Yet in *Playing Oppression* Mary Flanagan and Mikael Jakobsson apply the incisive frameworks of postcolonial theory to a broad historical survey of board games to show how these seemingly benign entertainments reinforce the logic of imperialism Through this lens the commercialized version of Snakes and Ladders takes shape as the British Empire's distortion of Gyan Chaupar an Indian game of spiritual knowledge and early twentieth century trading games that fed French colonialism are exposed for how they conveniently sanitized its brutality while also relying on crudely racist imagery These games most explicitly abhorrent features may no longer be visible but their legacy still lingers in the contemporary Eurogame tendency to exalt and incentivize cycles of exploration expansion exploitation and extermination An essential addition to any player's bookshelf *Playing Oppression* deftly analyzes this insidious violence and proposes a path forward with board games that challenge colonialist thinking and embrace a much broader cultural imagination

The Fundamentals of Video Game Literacy Ryan Zhao, 2025-04-16 This book posits a novel framework for sense making and meaning making in the play of video games Extending a modern process oriented audience inclusive philosophy of artistic meaning generation this book grapples with the question of how to personally and critically examine video games as artistic artifacts that do not have set predetermined standardized forms until live play is enacted The resulting artistic product live gameplay expresses both the game's developers and its players This book argues that players hold three separate concurrent perspectives during play the embodied avatar within the simulated space the role playing participant in the narrative fantasy and the external strategist manipulating the game's software affordances The exciting dynamics that arise from live gameplay are the result of the tensions and harmonies between these three parallel layers of play Video games are systems with designed behaviors capable of a great diversity of instantiated expressions Players are brought into that system of instantiated generation to produce truly emergent and personal gameplay As such players directly impact the shape and form of the gameplay artifact itself This creates a relationship between the art the player and its meaning radically different from all previous art forms This book builds around this central premise with examinations of related subjects pertaining to video game meaning making such as the ways in which video games facilitate play that is expressive of their players and the ways in which it is appropriate to compare and contextualize the differences in players' instantiated play activities These subjects are designed to give readers an in depth understanding of the dynamics of gameplay in order to facilitate richer more meaningful encounters with video games as cultural artifacts This book Provides a useful framework for enriching players' experiences with video game play Helps players identify and distinguish aspects of their own and game developers' expression in

gameplay Posits a novel framework examining the role of player as embodied avatar role player and strategist Gives players appropriate questions to better interrogate the generation of meaning from within and surrounding the system of gameplay

Playing at a Distance Sonia Fizek,2022-11-01 An essential exploration of the video

game aesthetic that decenters the human player requiring little human action and challenges what it means to play Do we play video games or do video games play us Is nonhuman play a mere paradox or the future of gaming And what do video games have to do with quantum theory In *Playing at a Distance* Sonia Fizek engages with these and many more daunting questions forging new ways to think and talk about games and play that decenter the human player and explore a variety of play formats and practices that require surprisingly little human action Idling in clicker games wandering in walking simulators automating gameplay with bots or simply watching games rather than playing them Fizek shows how these seemingly marginal cases are central to understanding how we play in the digital age Introducing the concept of distance
