Beyond The University Why Liberal Education Matters:

Beyond the University Michael S. Roth, 2014-05-06 In this provocative contribution to the disputes surrounding a liberal education university president Michael S Roth focuses on important moments and seminal thinkers in America's long running argument over vocational vs liberal education

Redesigning Liberal Education William Moner, Phillip Motley, Rebecca Pope-Ruark, 2020-07-07 Redesigning liberal education requires both pragmatic approaches to discover what works and radical visions of what is possible The future of liberal education in the United States in its current form is fraught but full of possibility Today's institutions are struggling to maintain viability sustain revenue and assert value in the face of rising costs But we should not abandon the model of pragmatic liberal learning that has made America's colleges and universities the envy of the world Instead Redesigning Liberal Education argues we owe it to students to reform liberal education in ways that put broad and measurable student learning as the highest priority Written by experts in higher education the book is organized into two sections The first section focuses on innovations at 13 institutions Brown University College of the Holy Cross Connecticut College Elon University Florida International University George Mason University Georgetown University Lasell College Northeastern University Rollins College Smith College Susquehanna University and the University of Wisconsin Green Bay Chapters about these institutions consider the vast spectrum of opportunities and challenges currently faced by students faculty staff and administrators while also offering radical visions of the future of liberal education in the United States Accompanying vision chapters written by some of the foremost leaders in higher education touch on a wide array of subjects and themes from artificial intelligence and machines to the role that human dispositions mindsets resilience and time play in how we guide students to ideas for bringing playful concepts of creativity and openness into our work Ultimately Redesigning Liberal Education reveals how humanizing forces including critical thinking collaboration cross cultural competencies resilience and empathy can help drive our world This uplifting collection is a celebration of the innovative work being done to achieve the promise of a valuable engaging and practical undergraduate liberal education

The Reinvention of Liberal Learning Around the Globe Insung Jung, Ka Ho Mok, 2023-03-21 Despite or because we live in calculative and instrumental times in higher education liberal arts colleges and programmes

are flourishing They draw students fascinated by society and culture who want to make a creative contribution The Reinvention of Liberal Learning around the Globe is an indispensable introduction to this diverse and brilliant educational world Simon Marginson Professor of Higher Education Director of ESRC RE Centre for Global Higher Education University of Oxford The editors pull together a diverse set of authors to share a wide range of approaches and trends in shaping the present and future of our liberal arts institutions and programs The diversity of perspectives makes this book of interest and use to anyone thinking deeply about and acting in support of the future of higher education and liberal arts education Michael McDonald President Great Lakes Colleges Association and the Global Liberal Arts Alliance This book rigorously questions and redefines liberal arts education by examining unique contexts of Asia North and South America Europe Africa and the Middle East It also considers the complexity of contemporary issues and emerging innovations in higher education With the diversity of perspectives and experiences presented by the international authors we could envision future liberal arts education in nurturing global and caring leaders with multiple collaborative possibilities through this book Mikiko Nishimura Professor of International Christian University Japan Co President of the Global Research Network for Liberal Arts Education This volume comprehensively documents the transforming nature of liberal arts institutions within the overall tensions provided by the global pandemic occurring at the intersection with a major transitional moment of technology and communication Its timeliness is underscored by the geographic reach of its contributions providing a unique perspective on the multitude of ways in which higher education is responding to these powerful forces Deane E Neubauer Professor Emeritus of Political Science University of Hawaii Manoa Associate Director of the Asia Pacific Higher Education Research Partnership This is a most timely overview and analysis of liberal arts worldwide The editors brought together thoughtful scholars from around the world to demonstrate the dogged persistence resiliency and vulnerability of the liberal arts For those who still believe that the key value of higher learning is to enrich the intellect enliven the spirit and take more responsibility for the future of humanity this valuable book provides a framework for the future Gerard A Postiglione Emeritus Professor Honorary Professor of Education The University of Hong Kong Chapter 3 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

A Liberal Education Brendan Apfeld, Emanuel Coman, John Gerring, Stephen Jessee, 2024-01-18 An innovative and comprehensive account of the modern university's impact on social and political attitudes

The Future of American Higher Education Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the realities of growing social inequality the intractable

presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field

The Evidence Liberal Arts Needs Richard A. Detweiler, 2021-11-02

Empirical evidence for the value of a liberal arts education how and why it has a lasting impact on success leadership altruism learning and fulfillment In ongoing debates over the value of a college education the role of the liberal arts in higher education has been blamed by some for making college expensive impractical and even worthless Defenders argue that liberal arts education makes society innovative creative and civic minded But these qualities are hard to quantify and many critics of higher education call for courses of study to be strictly job specific In this groundbreaking book Richard Detweiler drawing on interviews with more than 1 000 college graduates aged 25 to 65 offers empirical evidence for the value of a liberal arts education Detweiler finds that a liberal arts education has a lasting impact on success leadership altruism learning and fulfillment over a lifetime Unlike other defenders of a liberal

arts education Detweiler doesn't rely on philosophical arguments or anecdotes but on data. He developed a series of interview questions related to the content attributes of liberal arts for example course assignments and majors the context attributes out of class interaction with faculty and students teaching methods campus life and the purpose attributes adult life outcomes. Interview responses show that although both the content of study and the educational context are associated with significant life outcomes the content of study has less relationship to positive adult life outcomes than the educational context. The implications of this research Detweiler points out range from the advantages of broadening areas of study to factors that could influence students' decisions to attend certain colleges. *Teaching Postdramatic Theatre* Glenn D'Cruz, 2018-04-06

This book explores the concept and vocabulary of postdramatic theatre from a pedagogical perspective. It identifies some of the major anxieties and paradoxes generated by teaching postdramatic theatre through practice with reference to the aesthetic cultural and institutional pressures that shape teaching practices. It also presents a series of case studies that identify the pedagogical fault lines that expose the power relations inherent in teaching with a focus on the higher education sector as opposed to actor training institutions. It uses auto ethnography performance analysis and critical theory to assist university teachers involved in directing theatre productions to deepen their understanding of the concept of postdramatic theatre.

A Praxis of Presence in Curriculum Theory William F. Pinar, 2022-08-31 Building on his seminal methodological contribution to the field, here William F. Pinar posits a praxis of presence as a unique form of individual engagement against current cultural crises in education. Bringing together a series of updated essays, articles and new writings to form this comprehensive volume, Pinar first demonstrates how a praxis of presence furthers the study of curriculum as lived experience to overcome self-enclosure, restart lived and historical time and understand technology through a process of regression, progression, analysis and synthesis. Pinar then further illustrates how this practice can inform curricular responses to countering presentism, narcissism and techno-utopianism in educators' work with digital natives. Ultimately, this book offers researchers, scholars and teacher educators in the fields of curriculum theory, the sociology of education and educational policy more broadly the analytical and methodological tools by which to advance their understanding of curriculum and in doing so allows them to tackle the main cultural issues that educators face today.

The Framework for Success in Postsecondary Writing Nicholas N. Behm, Sherry Rankins-Robertson, 2017-03-03 Illustrates the widespread applications of the Framework for Success in Postsecondary Writing, especially the eight habits of mind in helping students to be successful not only in postsecondary writing courses but also in four arenas of life: academic, professional, civic and personal.

The Oxford Handbook of Higher Education in the Asia-Pacific Region Devesh Kapur, Lily Kong, Florence Lo, David M. Malone, 2023-01-20 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID-19 pandemic. Asia Pacific's share of the world's Gross Domestic Product (GDP) doubled from 15 per

cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world's population and three of the world's five largest economies Asia is soon poised to home half of the world's middle class a class that is both the driver and the product of higher education The quality of a country's system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region's higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions

Why the Humanities Matter Today Lee Trepanier, 2017-03-08 The humanities in American higher education is in a state of crisis with declining student enrollment fewer faculty positions and diminishing public prestige Instead of recycling old arguments that have lost their appeal the humanities must discover and articulate new rationales for their value to students faculty administrators and the public Why the Humanities Matter Today In Defense of Liberal Education is an attempt to do so by having philosophers literature and foreign language professors historians and political theorists defend the value and explain the worth of their respective disciplines as well as illuminate the importance of liberal education By setting forth new

arguments about the significance of their disciplines these scholars show how the humanities can reclaim its place of prominence in American higher education *All Souls College, Oxford in the Early Eighteenth Century* Jeffrey R Wigelsworth, 2018-06-26 In the first detailed history of All Souls College under the Wardenship of Bernard Gardiner Jeffrey R Wigelsworth offers a character driven story that addresses scheming duplicity and self righteousness projected against some of the most important political and religious episodes of the early eighteenth century and the people who animated them Throughout this book Wigelsworth illuminates the ways in which All Souls and its warden were caught between competing visions of what England and consequently Oxford would look like in the aftermath of the Glorious Revolution of 1688 Key Texts on Interdisciplinary Higher Education Iris van der Tuin, 2025-07-29 Higher education is changing rapidly in response to the global challenges of the twenty first century but for disciplinarily trained lecturers interdisciplinary curriculum and course design is a time consuming process fraught with difficult pedagogical choices This reader is the first book to bring together key texts on interdisciplinary teaching and learning all drawn from a growing literature of peer reviewed academic books and journals As well as presenting extracts from these foundational texts commentaries provide essential guidance on the relevant themes helping lecturers to reflect on this fast moving landscape This is an essential resource for those designing and teaching interdisciplinary courses **Thinking Critically in College** Louis Newman, 2023-03-07 Finally a college prep book that actually prepares students for college Almost all first year college students discover that college courses are more academically challenging than they expected and certainly harder than classes in high school Professors expect students not just to absorb material but to analyze and synthesize it consider multiple perspectives evaluate conflicting evidence and then apply what they've learned in new contexts Thinking Critically in College explains how to do all this and more Louis E Newman draws on decades of experience as a professor at Carleton College and Dean of Academic Advising and Associate Vice Provost for Undergraduate Education at Stanford offering the guidance you need to succeed both in college and in life post graduation Unique among college prep books Thinking Critically in College builds on the latest research in learning spells out the key critical thinking skills you need shows you how to tackle actual college assignments and provides exercises throughout to reinforce the lessons Written in a personal engaging style Thinking Critically in College explains how to do the work your professors will require exactly the preparation you need no matter what your academic background Practical accessible comprehensive and interactive Thinking Critically in College is the definitive guide not only for those in college or headed there but for everyone who needs a refresher on thinking clearly

Diversity and Inclusion in Global Higher Education Catherine Shea Sanger, Nancy W. Gleason, 2020-01-06 This open access book offers pioneering insights and practical methods for promoting diversity and inclusion in higher education classrooms and curricula It highlights the growing importance of international education programs in Asia and the value of understanding student diversity in a changing evermore interconnected world The book explores diversity across physical

psychological and cognitive traits socio economic backgrounds value systems traditions and emerging identities as well as diverse expectations around teaching grading and assessment Chapters detail significant trends in active learning pedagogy writing programs language acquisition and implications for teaching in the liberal arts adult learners girls and women and Confucian heritage communities A quality relevant 21st Century education should address multifaceted and intersecting forms of diversity to equip students for deep life long learning inside and outside the classroom This timely volume provides a unique toolkit for educators policy makers and professional development experts **The Routledge Companion to**

Postcolonial and Decolonial Literature Praseeda Gopinath, Laura Brueck, 2024-09-30 Working within a global frame The Routledge Companion to Postcolonial and Decolonial Literature considers postcolonial and decolonial literary works across multiple genres languages and both regional and transnational networks The Companion extends beyond the entrenched hegemony of the postcolonial or Anglophone novel to explore other literary formations and vernacular exchanges It foregrounds questions of language and circulation by emphasizing translation vernacularity and world literature This text expands the linguistic regional and critical foci of the emergent field of decolonial studies pushing against the normative currents of postcolonial literary studies and offers a critical consideration of both The volume prioritizes new literatures and critical theories of diasporas borderlands detentions and forced migrations in the face of environmental catastrophe and political authoritarianism reframing postcolonial decolonial literary studies through an emphasis on multilingual literatures This will be a crucial resource for undergraduate and graduate students of postcolonial and decolonial studies **The**

Abandoned Mission in Public Higher Education Benjamin P. Bowser, 2016-10-04 The debate about how higher education is failing to play a role in reducing inequality often centers on elite colleges while ignoring the numerous public colleges and universities that educate the majority of our students This book adds to the discussion by exploring an in depth case study of the largest public higher educational system in the United States The California State University with implications for other state systems as well Benjamin P Bowser experienced faculty member and author discusses higher education reforms in response to increasing tuition underprepared graduates and declining academic standards Focusing on the faculty perspective this text examines how these reforms can threaten the mission of a public institution only exacerbating the crisis of higher education and inequality **Transmedia Knowledge for Liberal Arts and Community Engagement** Jon

McKenzie, 2019-07-27 This book sets forth a pedagogy for renewing the liberal arts by combining critical thinking media activism and design thinking Using the StudioLab approach the author seeks to democratize the social and technical practices of digital culture just as nineteenth century education sought to democratize literacy This production of transmedia knowledge from texts and videos to comics and installations moves students between seminar studio lab and field activities The book also wrestles with the figure of Plato and the very medium of knowledge to re envision higher education in contemporary societies issuing a call for community engagement as a form of collective thought action *Safe Enough*

Spaces Michael S. Roth, 2019-08-20 From the president of Wesleyan University a compassionate and provocative manifesto on the crises confronting higher education In this bracing book Michael S Roth stakes out a pragmatist path through the thicket of issues facing colleges today to carry out the mission of higher education With great empathy candor subtlety and insight Roth offers a sane approach to the noisy debates surrounding affirmative action political correctness and free speech urging us to envision college as a space in which students are empowered to engage with criticism and with a variety of ideas Countering the increasing cynical dismissal from both liberals and conservatives of the traditional core values of higher education this book champions the merits of different diversities including intellectual diversity with a timely call for universities to embrace boldness rigor and practical idealism
