A Vocabulary Of Architectural Forms:

Concept Sourcebook Edward T. White, 1975 *Architecture: Form, Space, and Order* Francis D. K. Ching, 2023-04-11
ARCHITECTURE THE GOLD STANDARD IN INTRODUCTORY ARCHITECTURE TEXTS FULLY UPDATED TO REFLECT THE LATEST DEVELOPMENTS IN THE FIELD For more than forty years the beautifully illustrated *Architecture Form Space and Order* has served as the classic introduction to the basic vocabulary of architectural design In this fifth edition more recent additions to the architectural panoply illustrate how contemporary digital and building technologies have influenced the development of architectural forms and spaces and how architectural siting and design have responded to the call for more environmentally responsible buildings It is designed to encourage critical thought and to promote a more evocative understanding of architecture The fifth edition is updated with many new urban design and building precedents from a diverse range of cultural and geographic areas New content focuses on the latest technology and trends in structure construction materials and sustainability Includes more than 800 illustrations many hand drawn which demonstrate the foundations and concepts every architect must master *Architecture Form Space and Order* distills complex concepts of design into a clear focus and brings difficult abstractions to life It explains form and space in relation to light view openings and enclosures and explores the organization of space and the elements and relationships of circulation as well as proportion and scale In addition the text s detailed illustrations demonstrate the concepts presented and reveal the relationships between fundamental elements of architecture through the ages and across cultures *The Four Books of Architecture* Andrea Palladio, 2013-07-24 Exemplary reprint of 16th century classic Covers classical architectural remains Renaissance revivals classical orders more 216 plates the most influential book published in the history of architecture *Art in America* Modernity, Nation and Urban-Architectural Form Shireen Jahn Kassim, Norwina Mohd Nawawi, Mansor Ibrahim, 2018-07-20 This book explores how Malaysia as a multicultural modern nation has approached issues of nationalism and regionalism in terms of physical expression of the built environment Ever since the nation s post Colonial era architects and policy makers have grappled with the theoretical and practical outcomes of creating public architecture that effectively responds to traditions nationhood and modernity The authors compile and analyse prevailing ideas and strategies present case studies in architectural language and form and introduce the reader to tensions arising between a nationalist agenda and local regionalist architectural language These dichotomies represent the very nature of multicultural societies and issues with identity a challenge that various nations across the globe face in a changing environment This topical and pertinent volume will appeal to students and scholars of urban planning architecture and the modern city *Architectural Design Instruments* Sébastien Bourbonnais, 2024-07-23 While it is undeniable that architectural practices have been transformed with the advent of digital technologies they nevertheless continue to occupy an ambiguous or even problematic place within the design process The underlying premise of this book on architectural design instruments is not to see them simply as

means to an autonomous end one that is pure and detached from any other technological aspect but instead to see these instruments and their formative abilities as a different way in which architects can approach design We maintain that it is through the very act of experimentation with these instruments that their various potentials are revealed and established It is through such repeated experimentation which is constantly being revised and consolidated that practice is successfully and sustainably transformed This view is less of a wish than it is an observation and as such it can be seen in the various practices that are analyzed in this book Building the State: Architecture, Politics, and State Formation in Postwar Central Europe Virag Molnar, 2013-10-08 The built environment of former socialist countries is often deemed uniform and drab an apt reflection of a repressive regime Building the State peeks behind the grey facade to reveal a colourful struggle over competing meanings of the nation Europe modernity and the past in a divided continent Examining how social change is closely intertwined with transformations of the built environment this volume focuses on the relationship between architecture and state politics in postwar Central Europe using examples from Hungary and Germany Built around four case studies the book traces how architecture was politically mobilized in the service of social change first in socialist modernization programs and then in the postsocialist transition Building the State does not only offer a comprehensive survey of the diverse political uses of architecture in postwar Central Europe but is the first book to explore how transformations of the built environment can offer a lens into broader processes of state formation and social change

The Contradiction Between Form and Function in Architecture John Shannon Hendrix, 2013-02-15 Continuing the themes that have been addressed in The Humanities in Architectural Design and The Cultural Role of Architecture this book illustrates the important role that a contradiction between form and function plays in compositional strategies in architecture The contradiction between form and function is seen as a device for poetic expression for the expression of ideas in architecture Here the role of the terms form and function are analyzed throughout the history of architecture and architectural theory from Vitruvius to the present with particular emphasis on twentieth century functionalism Historical examples are given from Ancient Classical Islamic Christian Byzantine Gothic Renaissance Mannerist and Neoclassical architecture and from movements in the twentieth century to the present In addition

philosophical issues such as lineamenti Vorstellung difference dream construction deep structure and surface structure topology theory self generation and immanence are explored in relation to the compositions and writings of architects throughout history This book contributes to the project of re-establishing architecture as a humanistic discipline to re-establish an emphasis on the expression of ideas and on the ethical role of architecture to engage the intellect of the observer and to represent human identity

The Routledge Companion for Architecture Design and Practice Mitra Kanaani, Dak Kopec, 2015-11-06 The Routledge Companion for Architecture Design and Practice provides an overview of established and emerging trends in architecture practice. Contributions of the latest research from international experts examine external forces applied to the practice and discipline of architecture. Each chapter contains up-to-date and relevant information about select aspects of architecture and the changes this information will have on the future of the profession. The Companion contains thirty-five chapters divided into seven parts: Theoretical Stances, Technology, Sustainability, Behaviorism, Urbanism, Professional Practice, and Society. Topics include Evidence-Based Design, Performativity, Designing for Net Zero Energy, The Substance of Light in Design, Social Equity and Ethics for Sustainable Architecture, Universal Design, Design Psychology, Architecture Branding, and the Politics of Identity, The Role of BIM in Green Architecture, Public Health and the Design Process, Affordable Housing, Disaster Preparation and Mitigation, Diversity, and many more. Each chapter follows the running theme of examining external forces applied to the practice and discipline of architecture in order to uncover the evolving theoretical tenets of what constitutes today's architectural profession and the tools that will be required of the future architect. This book considers architecture's interdisciplinary nature and addresses its current and evolving perspectives related to social, economic, environmental, technological, and globalization trends. These challenges are central to the future direction of architecture, and as such, this Companion will serve as an invaluable reference for undergraduate and postgraduate students, existing practitioners, and future architects.

Structure As Architecture Andrew Charleson, 2014-07-11 Structure as Architecture presents a comprehensive analysis of the indispensable role of structure in architecture. An exploration as well as a celebration of structure, the book draws on a series of design studies and case study examples to illustrate how structure can be employed to realize a wide range of concepts in contemporary architecture. By examining design principles that relate to both architecture and structural engineering, Andrew Charleson provides new insights into the relationship between both the technical and aesthetic aspects of architecture. Now in its second edition, the text has been extensively revised and updated.

throughout Features include A brand new chapter on hidden structure adding to the material on exposed structures Two new chapters on using structure to realise common architectural concepts through a combination of precedents and creative design Over 50 new case studies from across the globe Easy to understand diagrams and a highly visual design to aid understanding and accessibility More than two hundred case studies of contemporary buildings from countries such as the UK the US France Germany Spain Hong Kong Australia and Japan illustrate how a thorough integration of structure adds layers of richness and enhances the realisation of architectural design concepts
