Times Eye A Time Odyssey 1 By Arthur C Clarke:

Time's Eye Arthur Charles Clarke, 2004 Sir Arthur C Clarke is a living legend a writer whose name has been synonymous with science fiction for more than fifty years An indomitable believer in human and scientific potential Clarke is a genuine visionary If Clarke has an heir among today's science fiction writers it is award winning author Stephen Baxter In each of his acclaimed novels Baxter has demonstrated dazzling gifts of imagination and intellect along with a rare ability to bring the most cerebral science dramatically to life Now these two champions of humanism and scientific speculation have combined their talents in a novel sure to be one of the most talked about of the year a 2001 for the new millennium **TIME S EYE** For eons Earth has been under observation by the Firstborn beings almost as old as the universe itself The Firstborn are unknown to humankind until they act In an instant Earth is carved up and reassembled like a huge jigsaw puzzle Suddenly the planet and every living thing on it no longer exist in a single timeline Instead the world becomes a patchwork of eras from prehistory to 2037 each with its own indigenous inhabitants Scattered across the planet are floating silver orbs impervious to all weapons and impossible to communicate with Are these technologically advanced devices responsible for creating and sustaining the rifts in time Are they cameras through which inscrutable alien eyes are watching Or are they something stranger and more terrifying still The answer may lie in the ancient city of Babylon where two groups of refugees from 2037 three cosmonauts returning to Earth from the International Space Station and three United Nations peacekeepers on a mission in Afghanistan have detected radio signals the only such signals on the planet apart from their own The peacekeepers find allies in nineteenth century British troops and in the armies of Alexander the Great The astronauts crash landed in the steppes of Asia join forces with the Mongol horde led by Genghis Khan The two sides set out for Babylon each determined to win the race for knowledge and the power that lies within Yet the real power is beyond human control perhaps even human understanding As two great armies face off before the gates of Babylon it watches waiting **Time's Eye** Arthur Charles Clarke, Stephen Baxter, 2004 1885 the North West Frontier Rudyard Kipling is witness to a bizarre encounter between the British army and what appears to be an impossibly advanced piece of Russian technology And then to a terrifying intervention by a helicopter from 2037 Before the full impact of this extraordinary event has even begun to sink in Kipling his friends and the helicopter crew stumble across Alexander the Great's army Mankind's time odyssey has begun It is a journey that will see Alexander avoid his premature death and carve out an Empire that expands from Carthage to China beating the time slipped army of Genghis Khan in a battle outside the ruins of Babylon in the process And it will present mankind with two devastating truths Aliens are amongst us and have been manipulating our past and our future And that future extends only as far as 2037 for that is the date Earth will be destroyed This is SF that spans countless centuries and carries cutting edge ideas on time travel and alien intervention It shows two of the genre's masters at their groundbreaking best *Arthur C. Clarke* Gary Westfahl, 2018-06-14 Already renowned for his science fiction and scientific nonfiction Arthur

C Clarke became the world's most famous science fiction writer after the success of 2001 A Space Odyssey. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise* that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty-first century. *The New York Times Index*, 2004

Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future. Can the genre actually provide glimpses of the world of tomorrow? This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature. Among the texts and topics examined are classic stories by Murray Leinster, C. L. Moore, and Cordwainer Smith; 2001 A Space Odyssey and its sequels; Japanese anime and Hong Kong cinema; and electronic fiction. **Dictionary of International Biography ...**, 2005 A biographical record of contemporary achievement together with a key to the location of the original biographical notes. *The Mammoth Book of Best New SF 21* Gardner Dozois, 2011-08-04 Widely regarded as the benchmark anthology for every science fiction fan, *The Mammoth Book of Best New SF 21* continues to uphold its standard of excellence with over two dozen stories from the previous year.
