Ecological Sustainability and Integrity: Concepts and Approaches J. Lemons, L. Westra, Robert

Goodland, 2013-04-17 This book follows upon earlier work which culminated in the publication of two recent books Sustainable Development Science Ethics and Public Policy John Lemons and Donald A Brown editors and Perspectives on Ecological Integrity Laura Westra and John Lemons editors Both of these books also were published by Kluwer Academic Publishers In this book we seek to explore more fully the concepts of sustainability and ecological integrity as well as the connections between them We have divided chapters into three groups In the first the concept of sustainability in relation to science law and ethics is explored In the second concepts of sustainability and ecological integrity are applied to problems in specific natural resources Finally in the third group we examine possible approaches to public policy which might include concepts of sustainability and ecological integrity Overall we believe that this collection presents a wide variety of perspectives discussions and case studies John Lemons Laura Westra Robert Goodland Editors ix CONTENTS PART I Sustainability in Relation to Science Law and Ethics Chapter 1 The Concept of Sustainability A Critical Approach Lynton K Caldwell 1 Problems of Definition 2 Behavioral Obstacles 4 Psychological Obstacles Seven Deadly Sins of Unsustainability 8 4 *Ontology and Closeness in Human-Nature Relationships* Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human Nature Relationships* Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce s synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an

engaging novel treatment of human nature relational ontology that will encourage the reader to look at the world in a whole new way *Environmental Justice in Developing Countries* Rhuks Ako,2013-08-15 The evolving environmental justice paradigm is conceptualized differently based on political economic and historical factors In developed countries emphasis is placed on the role of individuals in environmental decision making and the protection of their access to the prerequisite environmental information and capacity to challenge environmental decisions is the main focus However in developing countries access to land and natural resources are considered integral elements of environmental justice paradigm This book focuses on the conceptualization recognition and protection of environmental justice in developing countries It explores the situation by engaging an analytical discourse of relevant legal provisions in four case study countries including Nigeria South Africa India and Papua New Guinea The comparative analysis of environmental justice in these countries present a framework within which to appreciate the conceptualization of the environmental justice paradigm *Handbook of Research on Promoting Sustainable Public Transportation Strategies in Urban Environments* Yilmaz, Zafer,Golem, Silvia,Costescu, Dorinela,2023-01-16 The traditional urban transportation systems around the globe are now being transferred into green public transportation systems in an effort to mitigate CO2 emissions and provide nature friendly transportation systems in cities and ultimately to increase citizens wellbeing Furthermore the cities are expected to transform their traditional transportation systems to cutting edge high technology green transportation systems in the near future due to regulations applied by the related authorities such as the EU and UN At the same time cities are undergoing a transformation from traditional to smart cities which is an inevitable process due to swift developments in technologies and smart systems Sustainable public transportation systems must be developed and adjusted to be applicable in future smart cities The Handbook of Research on Promoting Sustainable Public Transportation Strategies in Urban Environments considers the challenges and advantages of sustainable public transportation systems in urban areas and provides relevant theoretical frameworks the latest empirical research findings and an overview of the latest technological developments on the subject Covering key topics such as green vehicles sustainability and walkable cities this major reference work is ideal for policymakers government officials industry professionals researchers scholars practitioners academicians instructors and students **Encyclopedia of Global Change** Andrew S. Change Yilmaz Kaplan,2025-11-05 The climate crisis has emerged as a consequence of the linear economic system that developed in the aftermath of the Industrial Revolution In recent years global actors have recognised the need for institutional change from the linear economy to a more sustainable alternative The circular economy This book analyses the potential for transformative institutional change to a circular economy both in theory and in practice At the theoretical level the book evaluates the feasibility of transitioning from a linear economy system to a circular economy by drawing on the principles of New Institutionalism It thoroughly examines the key parameters of institutional change focusing on the role of actors and new ideas within the institutional change process Building upon this theoretical framework the book then delves into the practical implementations of key actors It first explores the role of the state and the market as crucial institutional

actors referencing the historical debate between these two entities Additionally the book critically assesses the agenda setting power of influential international organisations specifically the United Nations and the World Trade Organization in driving a circular institutional change Furthermore it analyses the circular economy policies of influential global actors such as the European Union China Japan and the USA Aligned with these analyses the book also examines the potential of a circular institutional change to bring about a paradigm shift from the prevailing industrial and consumer centric society to an ecologically oriented society This book is invaluable for readers interested in the circular economy new institutionalism the impacts of climate change and alternative economic policy *Institutions, Sustainability, and Natural Resources* Shashi Kant,R. Albert Berry,2005-09-06

This work proposes that new economic theory rather than a new public policy based on old theory is needed to guide humanity toward sustainability The book includes the ideas from old as well as new institutional economics discussed in detail by leading experts in the field This book follows a companion work Economics Sustainability and Natural Resources Economics of Sustainable Forest Management volume 1 of the series *ENVIRONMENTAL INDICES : SYSTEMS ANALYSIS APPROACH - Volume I* Yuri A. Pykh ,D. Eric Hyatt,Roman J.M Lenz ,2000-09-19

Environmental Indices Systems Analysis Approach examines the theoretical development of environmental indices and their practical application Indicators can be powerful tools in guiding data and information collection processes and careful development will lead to more focused and cost effective global monitoring and observing systems at international level The authorship is drawn from a group of internationally distinguished scientists and researches who are actively working towards a comprehensive set of tools and protocols such as simulation models fuzzy clustering analysis and GIS methodologies that will lead to the development of meaningful environmental indices This book will be a vital reference work for students teachers and researches together with policy makers planners and all professional involved in development programs
