Transfer of Missile and Satellite Technology to China: A Summary of H.Res. 463 Authorizing a House Select Committee

Stephen W. Stathis
Specialist in American National Government
Government Division

On June 18, 1998, the House voted 409-10 to create a Select Committee on U.S. National Security and Military/Commercial Concerns with the People's Republic of China. The select committee will investigate, among other matters, allegations that the Clinton Administration allowed the Chinese government to acquire sensitive missile technology in exchange for campaign contributions, focusing on the national security consequences of those actions. This fact sheet provides a brief summary of H.Res. 463, which was reported by the Rules Committee (H.Rept. 105-582) on June 16. The resolution was considered under procedures that permitted no floor amendments.

Jurisdiction. H.Res. 463 charges the select committee with determining whether the transfer of technology, information, advice, goods, or services to the People's Republic of China enhanced:

- the accuracy, reliability, or capability of China's nuclear long-range missiles or other weapons;
- its domestic or foreign intelligence capabilities; and
- its manufacture of weapons of mass destruction, missiles, or other armaments.

The committee will also investigate, with respect to these transfers and enhancements:

- effects on the regional and national security of the United States;
- the conduct and decision-making of the executive branch, defense contractors, weapons manufacturers, satellite manufactures, and other firms;
- the enforcement of U.S. statutes, regulations, or executive orders;
- efforts by the Chinese government or other entities to influence these matters; and
- efforts to conceal or withhold relevant information or documents, obstruct justice, or obstruct any investigation of these matters.

Committee Structure and Rules. The select committee consists of nine members. Republican members include Representative Christopher Cox, chair, and Representatives Porter J. Goss, Douglas Bereuter, James V. Hansen, and Curt Weldon. Democratic members include Representative Norman D. Dicks, ranking minority member, and Representatives John M. Spratt, Jr., Lucille Roybal-Allard, and Robert C. Scott.

Meth Crs Report For Congress:

New Research on Methamphetamine Abuse Gerald H. Toolaney, 2007 Methamphetamine METH abuse has become a major public health problem world wide as demonstrated by increases in the number of emergency room visits substance abuse treatment episodes and arrests attributable to METH manufacture and abuse However there are currently no pharmacological treatments for the wide range of symptoms associated with METH abuse One of the reasons for this problem is that our knowledge of the cellular and molecular mechanisms underlying the development of METH induced psychosis and dependence is limited This book presents a review of the recent findings on METH abuse in humans First by describing the background and physiological effects of METH in humans Next by discussing the clinical findings on METH abusers derived using brain imaging techniques single photon emission computed tomography SPECT positron emission tomography PET magnetic resonance spectroscopy MRS and functional magnetic resonance imaging fMRI Finally by reviewing the potential therapeutic approaches for the treatment of METH abusers
