Gender and Natural Resource Management Rebecca Elmhirst,2008 This book is about the gender dimensions of natural resource exploitation and management with a focus on Asia It explores the uneasy negotiations between theory policy and practice that are often evident within the realm of gender environment and natural resource management especially where gender is understood as a political negotiated and contested element of social relationships It offers a critical feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns decentralized governance the elimination of poverty and themainstreaming of gender Through a combination of strong conceptual argument and empirical material from a variety of political economic and ecological contexts including Cambodia
