Military Review ,2006 *Intelligence and Propaganda in the Cases of Bosnia and Herzegovina and Afghanistan* Murat Aslan,2022-06-20 This book questions the efficiency of propaganda and the affiliated intelligence functions of international organisations by sampling NATO and to some extent the UN in peace operations It examines NATO operations in Bosnia Herzegovina and Afghanistan in detail as comparative analysis and considers the commitment of the US military since this is the main driver of the bulk of NATO activities In addition the book covers the communication and intelligence activities of the opposing elements in both Bosnia and Afghanistan to offer another comparative approach *Information Strategy and Warfare* John Arquilla,Douglas A. Bradford,2009-11-03 With more than 60 essays A Companion to American Military History presents a comprehensive analysis of the historiography of United States military history from the colonial era to the present Covers the entire spectrum of US history from the Indian and imperial conflicts of the seventeenth century to the battles in Afghanistan and Iraq Features an unprecedented breadth of coverage from eminent military historians and emerging scholars including little studied topics such as the military and music military ethics care of the dead and sports Surveys and evaluates the best scholarship on every important era and topic Summarizes current debates and identifies areas where conflicting interpretations are in need of further study [A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group](#) Paul J. Cook,2024-05-14 This book presents the U S Army Asymmetric Warfare Group AWG as an example of successful change by the Army in wartime It argues that creating the AWG required senior leaders to create a vision differing from the Army's self conceptualization change bureaucratic processes to turn the vision into an actual unit and then place the new unit in the hands of uniquely qualified leaders to build and sustain it In doing this it considers the forces influencing change within the Army and argues the two most significant are its self conceptualization and institutional bureaucracy The work explores three major subject areas that provide historical context The first is the Army's institutional history from the early 1950s through 2001 This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post Cold War future The Army's history is largely one of asymmetric warfare The work thus examines several campaigns that offered lessons for subsequent wars Some lessons the Army took to heart others it ignored As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG Finally the work chronicles the AWG's creation in 2006 growth and re assignment from the Army staff to a fully fledged organization subordinate to the U S Army

Training and Doctrine Command in 2011 to its deactivation This action resulted not from the unit s failure to adapt to a post insurgency Army focusing on modernization Rather it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency it provided the capability to support the Army during a period of great strategic and institutional uncertainty
