Unit 4: Chemical Reactions - Introduction for Reactions - Net Ionic Equations - Representations of Reactions - Physical and Chemical Changes - Stoichiometry - Introduction to Titration - Types of Chemical Reactions - Introduction to Acid-Base Reactions - Oxidation-Reduction (Redox) Reactions	BIG IDEA 1: Scale, Proportion, and Quantity BIG IDEA 3: Transformations	- I can identify evidence of chemical and physical changes in matter. - I can represent changes in matter with a balanced chemical or net ionic equation: a. For physical changes; b. For given information about the identity of the reactants and/or product. - For ions in a given chemical reaction I can represent a given chemical reaction or physical process with a consistent particulate model. - I can explain the relationship between macroscopic characteristics and bond interactions for: a. Chemical processes; b. Physical processes. - I can explain changes in the amounts of reactants and products based on the balanced reaction equation for a chemical process. - I can identify the equivalence point in a titration based on the amounts of the titrant and analyte, assuming the titration reaction goes to completion. - I can identify a reaction as acid-base, oxidation-reduction, or precipitation. - I can identify species as Brønsted-Lowry acids, bases, and/or conjugate acid-base pairs, based on proton-transfer involving those species. - I can represent a balanced redox reaction equation using half-reactions.	10 days
Unit 5: Kinetics - Reaction Rates - Introduction to Rate Law - Concentration Changes Over Time - Elementary Reactions - Collision Model - Reaction Energy Profile - Introduction to Reaction Mechanism - Mechanism Reaction Mechanism and Rate Law - Steady-State	BIG IDEA 3: Transformations BIG IDEA 6: Energy	- I can explain the relationship between the rate of a chemical reaction and experimental parameters. - I can represent experimental data with a consistent rate law expression. - I can identify the rate law expression of a chemical reaction using data that show how the concentrations of reaction species change over time. - I can represent an elementary reaction as a rate law expression using stoichiometry. - I can explain the relationship between the rate of an elementary reaction and the frequency, energy, and orientation of molecular collisions. - I can represent the activation energy and overall energy change in an elementary reaction using a reaction energy profile. - I can identify the components of a reaction mechanism. - I can identify the rate law for a reaction from a mechanism in which the first step is rate limiting. - I can identify the rate law for a reaction from a mechanism in which the	10 days

Contracts for the International Sale of Goods Franco Ferrari,2011-12-23 Contracts for the International Sale of Goods provides an examination of the United Nations Convention on Contracts for the International Sale of Goods CISG Extensively referenced the volume focuses on the exact determination of the CISG s sphere of application both the non conformity of delivered goods and the notice of non conformity and the determination of the rate of interest on sums in arrears **CISG and the Unification of International Trade Law** Bruno Zeller,2008-03-25 Pushing the boundaries of domestic and unified laws this book re defines unification and harmonization Critically examining the CISG Zeller explores where its influence can be extended and considers whether unification is a myth or a reality Catalogue of Copyright Entries ,1912-07 *Global Atmospheric Chemical Change* C.N. Hewitt,W.T. Sturges,2013-11-11 Air pollution has historically been viewed as a local or regional scale problem with attention focused on acute episodes such as the sulphur dioxide and smoke smogs of London in the 1950s and 1960s and the photochemical smogs of southern California first recognized by Haagen Smit in the early 1950s In recent years however it has become apparent that human activity has and still is changing the chemical composition of the atmosphere on a global scale The composition of the atmosphere has seen enormous changes due to natural processes since the formation of the planet Data obtained from air bubbles trapped in polar ice are beginning to reveal information about these changes over the last tens of thousands of years and geochemical models of the evolution of the Earth give us insights into the changes over much longer periods of time Perhaps the crucial differences between these natural changes and those now being induced by man are their relative rates of change The magnitude of present day fluxes of some compounds released as air pollutants is in some cases much larger than those arising naturally In other cases for example carbon dioxide the anthropogenic emission rates are small compared with that of the natural cycle but the kinetics of the system are such that the steady state concentrations of the compounds in the atmosphere are now being perturbed **Research in Education** ,1969 **The Legal Career Guide** Gary A. Munneke, Ellen S. Djakhongir Saidov, 2015-04-30 This book provides a detailed examination of the issue of conformity of goods and documents under the United Nations Convention on Contracts for the International Sale of Goods 1980 CISG. This issue lies at the heart of sales law and is one of the most frequently litigated. The book explores the Convention's requirements as to quality, quantity, description and packaging of the goods, conformity, the requirements flowing from the need for the goods to be free from rights or claims of third parties and the questions of what documents the seller must deliver to the buyer and what constitutes a good document under the CISG. The book engages extensively with a substantial body of cases decided under the CISG and academic commentary. It systematises the Convention's experience to date with a view to turning it into an integrated comprehensive and distinctive CISG legal regime on conformity of goods and documents. The analysis is comparative and draws on the experience of some major domestic legal systems such as English and US law. The focus is both analytical and practical. The book will be of interest to legal practitioners, academic lawyers and students with an interest in international and comparative sales, commercial and contract law.
