Activating The Unemployed Activating The Unemployed:

Activating the Unemployed Neil Gilbert, Rebecca A. Van Voorhis, 2017-11-30 The last decade has witnessed a conspicuous alteration in policies protecting unemployed people in modern welfare states Social policies are increasingly designed to encourage economic independence Policy makers have introduced a wide range of reforms linking disability unemployment and welfare programs cash benefits to work oriented measures Welfare policies are being framed by a new emphasis on recipients obligations emphasizing that the receipt of benefits creates a responsibility to take action towards becoming self reliant The objective is to minimize the duration of dependence or improve the well being of family or community *Activating the Unemployed* addresses this growing interest in work oriented measures This represents a shift in the dominant discourse on social welfare from focus on the citizen s rights to social benefits to emphasis on their responsibilities to work and lead an active life In this volume a distinguished array of international contributors provide cross cultural perspectives to analyze recent diverse policy initiatives to activate the unemployed in nine countries Britain France Italy the Netherlands New Zealand Norway Sweden Switzerland and the United States Each provides a systematic account of the background design implementation and results of employment oriented measures Collectively they permit comparison of organized responses to common problems in the areas of public assistance welfare unemployment and disability among others Further chapters seek to broaden perspectives on policy options the issues raised and lessons learned in the course of activating the unemployed This thorough and insightful account addresses significant contemporary issues and concerns about welfare social security and unemployment It will aid policy makers professionals and scholars in assessing current trends in welfare in various countries throughout the world *Connecting People with Jobs Reaching Out and Activating Inactive and Unemployed Persons in Bulgaria* OECD, 2022-03-15 This report on Bulgaria is the eighth country study published in a series of reports looking into how policies connect people with jobs It provides a detailed analysis of Bulgaria s inactive and unemployed population and identifies groups of people who would benefit from measures and services provided by Bulgaria s Public Employment Service *Activating the Unemployed*, 2011 Explores current employment activation practices and interrelated factors in the Western Balkans including Kosovo and Turkey and comes up with policy options for more coherent activation policies with regard to unemployed people registered unemployed or welfare benefit recipients who are able to work directed towards increasing their capabilities and motivation to participate in active labour market measures and to search actively for a job

Frontline Delivery of Welfare-to-Work Policies in Europe Rik van Berkel, Dorte Caswell, Peter Kupka, Flemming Larsen, 2017-06-27 Welfare to work or activation policies refer to programmes aimed at promoting the employability labour market and social participation of benefit recipients of working age Frontline workers delivering these policies are conceived of as policy implementers as policy makers and as actors mediating politics in an arena where conflicting interests are at stake Frontline work plays a crucial role in determining what welfare to work practically means

and how it affects the lives of the people it targets Yet few books have deliberately focused on comparing what happens when frontline workers some of whom are professional social workers meet clients Pioneering the provision of scholarly reflections on both theoretical and policy relevance of studying frontline practices of delivering activation internationally renowned researchers present the first comparative analysis of how activation policies are actually delivered by frontline staff in selected EU countries and in the United States In trying to understand and interpret frontline practices in activation each contribution provides insights into what activation in practice looks like what services are provided and how they are enacted This involves examining processes of client selection monitoring sanctioning and motivating as well as the role of external service providers This book is an important acquisition for scholars and researchers of social policy public administration public management social work and policy implementation

Unemployment and Activation Policies in Europe and the US Henning Jørgensen, Michaela Schulze, 2024-11-08 This insightful book presents a detailed analysis of the activation policies utilized by governments across Europe and the US Editors Henning Jørgensen and Michaela Schulze bring together a wealth of experts to collate key developments and understandings in global activation policies acknowledging the different ways in which countries and governments attempt to combat unemployment and the importance of subnational governance capabilities

Bringing the Jobless into Work? Werner Eichhorst, Otto Kaufmann, Regina Konle-Seidl, 2008-09-09 Over the last decade many industrialized countries shifted from passive unemployment and welfare benefit regimes and traditional active labor market and social policies to activation strategies by making benefit receipt conditional upon accepting job offers or participation in active labor market schemes But countries differ with regard to the design of activation instruments and their implementation the definition of target groups and the effects of activation in the national labor market setting This volume provides an up to date overview of activation strategies in unemployment benefit systems and social assistance in selected European countries and the US A particular focus lies on the development of activation schemes governance and implementation as well as on the outcomes of activation in terms of labor market and social integration The volume is the first to address these issues both from a socio economic and a legal perspective

Activation Policies and the Protection of Individual Rights Paul Van Aerschot, 2016-03-16 In Denmark Finland and Sweden the evolution of administrative law including social welfare law has been marked by a shift towards a stronger protection of the recipient's individual rights The adoption of activation policies targeting recipients of social assistance has highlighted the tensions between decision making concerning the implementation of these policies and the legislative efforts to promote the realisation of individual rights in the field of social welfare An examination of the legislation in question and its implementation conditions shows that the realisation of individual rights is subordinated to the pursuit of organisational and other objectives The findings of the study are used to formulate proposals for the promotion of individual rights based on the Nordic egalitarian model of citizenship This critical assessment of activation policies should be of broad international

appeal It will be of interest to researchers in social policy as well as those concerned with protection of rights **The Moral Economy of Activation** Magnus Paulsen Hansen, 2019-09-11 Activation policies which promote and enforce labour market participation continue to proliferate in Europe and constitute the reform blueprint from centre left to centre right as well as for most international organizations Through an in depth study of four major reforms in Denmark and France this book maps how co existing ideas are mobilised to justify criticise and reach activation compromises and how their morality sediments into the instruments governing the unemployed By rethinking the role of ideas and morality in policy changes this book illustrates how the moral economy of activation leads to a permanent behaviourist testing of the unemployed in public debate as well as in local jobcentres **Reshaping Welfare States and Activation Regimes in Europe** SALTSA (Program), 2007 The activation based intervention paradigm is being adopted by several European countries resulting in major reforms to the social welfare system The spread of the activation paradigm has had major repercussions not only for welfare interventions aimed at combating unemployment but also for the political regulation of the social question and citizenship Citizenship is being redefined in contractual terms and greater emphasis is being placed on its economic aspects Nevertheless a wide range of policies are labelled with recourse to this interpretative framework and a pluralistic approach to implementation could serve just as well to empower as to weaken workers citizens position in society This book analyses the extent of these changes from a cross cultural perspective Institutional settings as well as prevailing work values and social representation of social exclusion activation regimes have a key role in defining the instruments to be used in national activation strategies to regulate the behaviour of job seekers In this book a discussion about the range of social welfare model reforms throughout Europe and a typology of activation regimes is proposed **Debating Unemployment Policy** Laurent Bernhard, Flavia Fossati, Regula Hänggli, Hanspeter Kriesi, 2019-05-02 Considers the policy debates surrounding unemployment in Western Europe after the outbreak of the Great Recession *Disability, Work and Inclusion in Ireland Engaging and Supporting Employers* OECD, 2021-09-22 Across OECD countries one in seven working age adults identifies as having a disability This report proposes policy recommendations to the Irish government to improve the participation of persons with disabilities *Rescaling Social Policies* Yuri Kazepov, 2010 This distinctive book highlights the comparative transversal and national issues of multi level governance in social welfare policies The author reports on three particular policy areas social assistance and local policies against poverty activation and labour market policies and care for the elderly whilst looking at the changes that have taken place over the past few years and their resulting effects It will be a key text for those concerned with social policy and welfare *Regulating the Risk of Unemployment* Jochen Clasen, Daniel Clegg, 2013-10 Regulating the Risk of Unemployment offers a systematic comparative analysis of reforms to unemployment protection systems in European countries since the early 1990s The volume sheds new light on important changes in a core field of welfare state activity Activating the Unemployed Neil Gilbert, Rebecca A. The Politics of Unemployment in Europe Marco Giugni, 2016-03-03 This book offers a state of the art discussion of the political issues surrounding unemployment in Europe Its unique combination offers both a policy and institutional perspective whilst studying the viewpoint of individual civil society members engaging in collective action on the issue of joblessness It is the result of Marco Giugni s three year cross national comparative research project financed by the European Commission united with hand picked contributions from invited experts Throughout his study he focuses on how the EU approaches national unemployment the main national differences in talk about unemployment and unemployment policy and how the representatives of the unemployed produce and coordinate demands in relation to unemployment policy This book contains a number of genuinely cross national chapters along with sections on specific national cases namely the UK Ireland Germany Switzerland Belgium and Sweden

Activation Or Workfare? Ivar Lødemel, Amilcar Moreira, 2014 The

last decade of the 20th century was marked by a shift in how welfare states deal with those at the bottom of the income ladder. This shift involved the introduction and strengthening of work obligations as a condition for receiving minimum income benefits which in some countries was complemented by efforts to help recipients return to the labour market namely through the investment in active labour market policies (ALMP). Based on case studies of developments in the US and eight European nations (UK, Norway, Denmark, Netherlands, Germany, France, Portugal and the Czech Republic) this book argues that this first set of reforms was followed by a second wave of reforms that whilst deepening the path towards the focus on work brings important innovations be it the tools used to help recipients back to the labour markets (ex financial incentives) and in how activation policies are delivered (ex integration of benefit and employment services). Looking at the array of developments introduced during this period we discern two key trends. The first concerns the strengthening of the role of the market in the governance of activation which is visible in the strengthening of the focus on work or the marketisation of employment services. The second concerns a move towards the individualisation of service delivery visible in the expansion of the use of personal action plans or in efforts to streamline service delivery. Finally we show that the onset of the sovereign debt crisis in Europe has triggered a new wave of reforms. Whilst tentative only our analysis points to a worrying trend of the curtailment or benefits (Portugal) and activation services (Netherlands, Czech Republic) to minimum income recipients and in parallel a further deepening of the focus on work conditionality (UK and Norway).

Connecting People with Jobs Towards Better Social and Employment Security in Korea OECD, 2018-03-14. This report has a special focus on low income groups, jobseekers and workers and policies geared towards closing the considerable gaps these groups are facing around income and employment support in Korea. It concludes that significant additional action will be needed to make income

Bureaucratic Manoeuvres John Grundy, 2019-01-01. In *Bureaucratic Manoeuvres* John Grundy examines profound transformations in the governance of unemployment in Canada. While policy makers previously approached unemployment as a social and economic problem to be addressed through macroeconomic policies, recent labour market policy reforms have placed much more emphasis on the supposedly deficient employability of the unemployed themselves, a troubling shift that deserves close critical attention. Tracing a behind-the-scenes history of public employment services in Canada, *Bureaucratic Manoeuvres* shows just how difficult it has been for administrators and frontline staff to govern unemployment as a problem of individual employability. Drawing on untapped government records, it sheds much needed light on internal bureaucratic struggles over the direction of labour market policy in Canada and makes a key contribution to Canadian political science, economics, public administration and sociology.
