sequel to Gayle Forman's *If I Stay* and though can be read independently the problem is it is so focused on Adam and Mia's troubled romance that character development is lacking for almost all of the characters This might make the *If I Stay* a worthy read After a troubling interview with a reporter who looked into Adam's past the rock star was forced to make some tough decisions Should he finally deal with his relationship issues with Mia stick to groupies or cement his newer relationship with actress Bryn This Analysis helps to decipher every aspect increasing your understanding of the book more than ever Before leaving town one night for a huge concert he made the impulsive decision to see Mia perform live Three years later he finally dealt with the emotions he'd had bottled up in his music and his dating life Temperamental and confused he knew his decisions would affect the state of the band his celebrity life and his music But is his happiness more important than his career This Analysis of *Where She Went* fills the gap making you understand more while enhancing your reading experience
