The Invention of the Colonial Americas Byron Ellsworth Hamann,2022-09-13 The story of Seville s Archive of the Indies reveals how current views of the sixteenth and seventeenth centuries are based on radical historical revisionism in Spain in the late 1700s The Invention of the Colonial Americas is an architectural history and media archaeological study of changing theories and practices of government archives in Enlightenment Spain It centers on an archive created in Seville for storing Spain s pre 1760 documents about the New World To fill this new archive older archives elsewhere in Spain spaces in which records about American history were stored together with records about European history were dismembered The Archive of the Indies thus constructed a scholarly apparatus that made it easier to imagine the history of the Americas as independent from the history of Europe and vice versa In this meticulously researched book Byron Ellsworth Hamann explores how building layouts systems of storage and the arrangement of documents were designed to foster the creation of new knowledge He draws on a rich collection of eighteenth century architectural plans descriptions models document catalogs and surviving buildings to present a literal materially precise account of archives as assemblages of spaces humans and data assemblages that were understood circa 1800 as capable of actively generating scholarly innovation

Contemporary Science Fiction and The Many-Worlds Interpretation of Quantum Mechanics Jonathan P. Lewis, 2025-10-02 This book seeks to create a new means of interrogating the direction in which contemporary science fiction is progressing In the late 1950s Hugh Everett III suggested that there is no way to say that there are not as many versions of what we experience as reality as there are particles in the universe This movement in contemporary science fiction serves as the foreground for the sense of loss and the need for sacrifice to set things right after generations of technological praxis by the nations and communities that have traditionally driven science fiction the Global North that have damaged communities throughout the Global South Colonialism and the drives for spheres of influence in the Cold War are now being met with the realities of such existential threats as global climate change Narratives about the loss of control over time reality and human consciousness demonstrate the on going ideological crises of faith in institutions like religion capitalism and education It is the grief for lost utopian dreams for the future that drives this interest in Everett s Many Worlds Interpretation of Quantum Mechanics or MWI
