Quantitative Techniques in Participatory Forest Management Eugenio Martinez-Falero, Susana Martin-Fernandez, Antonio D. Garcia-Abril, 2016-04-19 Forest management has evolved from a mercantilist view to a multi functional one that integrates economic social and ecological aspects However the issue of sustainability is not yet resolved Quantitative Techniques in Participatory Forest Management brings together global research in three areas of application inventory of the forest variables that determine the main environmental indices description and design of new environmental indices and the application of sustainability indices for regional implementations All these quantitative techniques create the basis for the development of scientific methodologies of participatory sustainable forest management Manual of Geospatial Science and Technology John D. Bossler, James B. Campbell, Robert B. McMaster, Chris Rizos, 2010-03-05 Following in the tradition of its popular predecessor the Manual of Geospatial Science and Technology Second Edition continues to be the authoritative volume that covers all aspects of the field both basic and applied and includes a focus on initiating planning and managing GIS projects This comprehensive resource which contains contributio **Public Works Manual** ,2002 *Canadian Journal of Forest Research* ,2012 Geomatica ,2009 **Advances on Mechanics, Design Engineering and Manufacturing V** Cristina Manchado del Val, Ramón Miralbes Buil, Guillermo Peris Fajarnés, María Moncho Santonja, Caterina Rizzi, Lionel Roucoules, 2025-05-03 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and nautical engineering and construction aeronautics and aerospace design and modeling The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented in this book will not only provide researchers engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work but also stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations New Developments and Environmental Applications of Drones Tomi Westerlund, Jorge Peña Queralta, 2024-01-17 This volume presents the conference proceedings from FinDrones 2023 The book highlights recent drone technology developments by experts and academicians for applications in agriculture forestry and other industries This iteration of FinDrones presents research using autonomous drones in various fields from environmental monitoring to farm robotics and from photogrammetry to search and rescue missions Emphasis is placed on contextualizing the conference presentations and content to Finland and the unique challenges typical to the region The work will interest academicians entrepreneurs and professionals involved in remote sensing applications of unmanned aerial vehicles and enthusiasts of drone technological developments *New Directions and Paradigms for the Study of Greek Architecture* ,2019-11-26 New Directions and Paradigms for the Study of Greek Architecture comprises 20 chapters by nearly

three dozen scholars who describe recent discoveries new theoretical frameworks and applications of cutting edge techniques in their architectural research The contributions are united by several broad themes that represent the current directions of study in the field i e the organization and techniques used by ancient Greek builders and designers the use and life history of Greek monuments over time the communication of ancient monuments with their intended audiences together with their reception by later viewers the mining of large sets of architectural data for socio economic inference and the recreation and simulation of audio visual experiences of ancient monuments and sites by means of digital technologies

Sensors Application in Agriculture Dimitrios S. Paraforos, Spyros Fountas, Francesco Marinello, 2020-11-06 Novel technologies are playing an important role in the development of crop and livestock farming and have the potential to be the key drivers of sustainable intensification of agricultural systems In particular new sensors are now available with reduced dimensions reduced costs and increased performances which can be implemented and integrated in production systems providing more data and eventually an increase in information It is of great importance to support the digital transformation precision agriculture and smart farming and to eventually allow a revolution in the way food is produced In order to exploit these results authoritative studies from the research world are still needed to support the development and implementation of new solutions and best practices This Special Issue is aimed at bringing together recent developments related to novel sensors and their proved or potential applications in agriculture

Beyond Digital Representation

Andrea Giordano, Michele Russo, Roberta Spallone, 2023-09-01 This book collects contributions which showcase the impact of new augmented reality AR and artificial intelligence AI technologies considered jointly in the fields of cultural heritage and innovative design AR is an alternative path of analysis and communication if applied to several fields of research in particular if related to space and artifacts in it This happens because the neural network development strengthens the relationship between augmented reality and artificial intelligence creating processes close to human thought in shorter times In the last years the AR AI expansion and the future scenarios have raised a deep trans disciplinary speculation The disciplines of representation drawing surveying visual communication as a convergence place of multidisciplinary theoretical and applicative studies related to architecture city environment tangible and intangible cultural heritage are called to contribute to the international debate The book chapters deal with augmented reality and artificial intelligence analyzing their connections as research tools for knowing the environment In particular the topics focus on the intersection between real and virtual world and on the heuristic role of drawing in the enhancement and management of cultural heritage in planning and monitoring the architecture the environment or the infrastructures Scientists involved in AR and AI research applied separately or together in the field of cultural heritage architectural design urban planning and infrastructures analysis as well as members of public and private organizations make up interdisciplinary groups that fuel the discussion focusing on the priorities and aims of the research related to the disciplines of representation

Applications of Small Unmanned Aircraft Systems

J.B. Sharma, 2019-10-18 Advances in high spatial resolution mapping capabilities and the new rules established by the Federal Aviation Administration in the United States for the operation of Small Unmanned Aircraft Systems sUAS have provided new opportunities to acquire aerial data at a lower cost and more safely versus other methods A similar opening of the skies for sUAS applications is being allowed in countries across the world Also sUAS can access hazardous or inaccessible areas during disaster events and provide rapid response when needed Applications of Small Unmanned Aircraft systems Best Practices and Case Studies is the first book that brings together the best practices of sUAS applied to a broad range of issues in high spatial resolution mapping projects Very few sUAS pilots have the knowledge of how the collected imagery is processed into value added mapping products that have commercial and or academic import Since the field of sUAS applications is just a few years old this book covers the need for a compendium of case studies to guide the planning data collection and most importantly data processing and map error issues with the range of sensors available to the user community Written by experienced academics and professionals this book serves as a guide on how to formulate sUAS based projects from choice of a sUAS flight planning for a particular application sensors and data acquisition data processing software mapping software and use of the high spatial resolution maps produced for particular types of geospatial modeling Features Focus on sUAS based data acquisition and processing into map products Broad range of case studies by highly experienced academics Practical guidance on sUAS hardware sensors and software utilized Compilation of workflow insights from expert professors and professionals Relevant to academia government and industry Positional and thematic map accuracy UAS curriculum development and workflow replicability issues This book would be an excellent text for upper level undergraduate to graduate level sUAS mapping application courses It is also invaluable as a reference for educators designing sUAS based curriculum as well as for potential sUAS users to assess the scope of mapping projects that can be done with this technology

New Technologies in Building and Construction David Bienvenido-Huertas, Juan

Moyano-Campos, 2022-05-15 This book presents contributions on new technologies in building and construction Buildings are complex elements that impact environment significantly The sustainability of this sector requires a holistic and multidisciplinary approach that allows adequate strategies to be established to reduce its environmental impact This heterogeneity is represented in these chapters which have been developed by researchers from different countries The book is divided into three sections i analysis ii design and modeling and iii solutions The book chapters together represent an advance in current knowledge about new technologies in building and construction crucial for researchers engineers architects policy makers and stakeholders

International Journal of Advanced Remote Sensing and GIS Cloud

Publications, 2012-01-01 International Journal of Advanced Remote Sensing and GIS IJARSG ISSN 2320 0243 is an open

access peer reviewed scholarly journal publishes original research papers reviews case study case reports and methodology articles in all aspects of Remote Sensing and GIS including associated fields This Journal commits to working for quality and transparency in its publishing by following standard Publication Ethics and Policies *Precision agriculture '19* John V. Stafford,2023-08-07 Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment market forces quality requirements traceability vehicle guidance and crop management Research continues to be necessary and needs to be reported and disseminated to a wide audience These proceedings contain reviewed papers presented at the 12th European Conference on Precision Agriculture held at Montpellier SupAgro France The papers reflect the wide range of disciplines that impinge on precision agriculture technology crop science soil science agronomy information technology decision support remote sensing and others The broad range of research topics reported will be a valuable resource for researchers advisors teachers and professionals in agriculture long after the conference has finished **Official Gazette of the United States Patent and Trademark Office** ,2003 *Better Roads* ,2004 ACSM Bulletin ,2006 **Surveying and Land Information Science** ,2010-06 Sensors in Agriculture Dimitrios Moshou,2019-06-12 Agriculture requires technical solutions for increasing production while lessening environmental impact by reducing the application of agro chemicals and increasing the use of environmentally friendly management practices A benefit of this is the reduction of production costs Sensor technologies produce tools to achieve the abovementioned goals The explosive technological advances and developments in recent years have enormously facilitated the attainment of these objectives removing many barriers for their implementation including the reservations expressed by farmers Precision agriculture and smart farming are emerging areas where sensor based technologies play an important role Farmers researchers and technical manufacturers are joining their efforts to find efficient solutions improvements in production and reductions in costs This book brings together recent research and developments concerning novel sensors and their applications in agriculture Sensors in agriculture are based on the requirements of farmers according to the farming operations that need to be addressed
