psychiatrists psychiatry residents psychologists therapists clinical social workers counselors nurses nurse practitioners
 physician assistants professors students and mental health researchers are the primary audience of the manual These

 books above describe different scales developed by different authors at different periods Each scale has its own rating
 guidelines and training requirements which must be followed by clinicians in order to use the scales This demands a
 considerable amount of time for clinicians and can be a barrier to using the scales in practice Even within the same
 psychopathology domain many published measurement scales exist For instance the book published by Waters and Stephane
 includes 120 scales for psychosis Among the 120 scales for psychosis which scale s should the clinician choose Our proposed
 manual will remove these barriers by creating simple and universal principles which allow readers to use the 33 reliable and
 validated SCIP scales with most adult psychiatric disorders There will be 15 videotaped interviews available online for
 readers who buy the book Readers are expected to watch the interviews in conjunction with reading the manual *The
