THE MASTER OF GO

"An archetypal saga . . . there are storms
and landscapes as cool, as luminous, as any
in Japanese paintings and woodcuts."

The Master Of Go By Yasunari Kawabata

Andrew Feenberg

The Master Of Go By Yasunari Kawabata:

The Master of Go Yasunari Kawabata, 2015-08-27 Go is a game of strategy in which two players attempt to surround each other's black or white stones. Simple in its fundamentals, infinitely complex in its execution, it is an essential expression of the Japanese sensibility. And in his fictional chronicle of a match played between a revered and invincible Master and a younger, more progressive challenger, Yasunari Kawabata captured the moment in which the immutable traditions of imperial Japan met the onslaught of the twentieth century. The competition between the Master of Go and his opponent Otak is waged over several months and layered in ceremony. But beneath the game's decorum lie tensions that consume not only the players themselves but their families and friends, tensions that turn this particular contest into a duel that can only end in one man's death. Luminous in its detail, both suspenseful and serene, *The Master of Go* is an elegy for an entire society, written with the poetic economy and psychological acumen that brought Kawabata the Nobel Prize for Literature. **The Master of Go**

Yasunari Kawabata, 1972 **Snow Country** Yasunari Kawabata, 1996-01-30 This masterpiece from the Nobel Prize-winning author and acclaimed writer of *Thousand Cranes* is a powerful tale of wasted love set amid the desolate beauty of western Japan. Kawabata's novels are among the most affecting and original works of our time. *The New York Times Book Review*: At an isolated mountain hot spring with snow blanketing every surface, Shimamura, a wealthy dilettante, meets Komako, a lowly geisha. She gives herself to him fully and without remorse, despite knowing that their passion cannot last and that the affair can have only one outcome. In chronicling the course of this doomed romance, Kawabata has created a story for the ages, a stunning novel dense in implication and exalting in its sadness. **The Study of Time IV** J. T. Design Unbound: Designing for Emergence in a White Water World, Volume 2 Ann M. Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today's hyper-connected, rapidly changing and radically contingent white water world. *Design Unbound* presents a new tool set for having agency in the twenty-first century in what the authors characterize as a white water world: rapidly changing, hyperconnected, and radically contingent. These are the tools of a new kind of practice that is the offspring of complexity science, which gives us a new lens through which to view the world as entangled and emerging, and architecture, which is about designing contexts. In such a practice, design unbound from its material thingness is set free to design contexts as complex systems. In a world where causality is systemic, entangled in flux, and often elusive, we cannot design for absolute outcomes. Instead, we need to design for emergence. *Design Unbound* not only makes this case through theory but also presents a set of tools to do so. With case studies that range from a new kind of university to organizational and even societal transformation, *Design Unbound* draws from a vast array of domains: architecture, science, and technology, philosophy, cinema, music, literature, and poetry, even the military. It is presented in five books bound as two volumes. Different books within the larger system of books will resonate with different reading audiences, from architects to people reconceiving higher education to the public policy or defense and intelligence communities. The

authors provide different entry points allowing readers to navigate their own pathways through the system of books
