A Perfect Vacuum Stanisław Lem, 1999 In a perfect vacuum Stanisław Lem presents a collection of book reviews of nonexistent works of literature works that in many cases could not possibly be written Embracing postmodernism's games for games sake ethos Lem joins the contest with hilarious and grotesque results Most of the reviews target the postmodern infatuation with antinarratives by lampooning their self indulgence and exploiting their mannerisms Lem exposes the limits of postmodern fiction showing how its studious self consciousness frequently conceals intellectual paucity Beginning with a review of his own book Lem moves on to tackle or create pastiches of the French new novel James Joyce pornography authorless writing and Dostoevsky while at the same time ranging across scientific topics from cosmology to the pervasiveness of computers Book Jacket

Tactical Publishing Alessandro Ludovico, 2024-12-17 How to level up to the next transformative phase of publishing with a critical methodology that transcends the dichotomy of paper and digital media production Publishing is experiencing one of the most transformative phases in its history In Tactical Publishing a sequel to Post Digital Print Alessandro Ludovico explores the forces driving this historical phase highlighting the tremendous opportunities it presents Our task he believes is to develop an alternative publishing system that transcends the dichotomy between paper and digital media He focuses first on the two activities on which publishing is premised reading and writing with an emphasis on writing machines and post truth in the latter and then deconstructs the concept proposing alternative strategies inspired by recent practices and unconventional uses of technology Ludovico shows how the radical and strategic use of print in the past can serve as the basis for our transition to the next phase of publishing He argues that the new ecology of publishing should be based on three main elements the stimulation of our senses the role of software in forming the publishing infrastructure and the importance of archives During this transition from the current post digital phase to the next phase independent publishers and artists as well as readers and machines will enable new structures and actions that realize the potential of publishing and the preservation of content thereby enriching social practices The author also considers the crucial social role played by new forms of libraries as artists and publishers shape the coming publishing world in its various manifestations Combining analytical accounts of tactical strategies with examples from artworks and experimental practices the book concludes with a manifesto for publishing in the twenty first century and an appendix with a selection of one hundred publications representing the periodic table of future publishing
