The Vanishing Newspaper [2nd Ed] Philip Meyer, 2009-09-01 Five years ago in *The Vanishing Newspaper* Philip Meyer offered the newspaper industry a business model for preserving and stabilizing the social responsibility functions of the press in a way that could outlast technology driven changes in media forms Now he has updated this groundbreaking volume taking current declines in circulation and the number of dailies into consideration and offering a greater variety of ways to save journalism Meyer s influence model is based on the premise that a newspaper s main product is not news or information but influence societal influence which is not for sale and commercial influence which is The model is supported by an abundance of empirical evidence including statistical assessments of the quality and influence of the journalist s product as well as its effects on business success Meyer now applies this empirical evidence to recent developments such as the impact of Craigslist and current trends in information technologies New charts show how a surge in newsroom employment propped up readership in the 1980s and data on the effects of newsroom desegregation are now included Meyer s most controversial suggestion making certification available for reporters and editors has been gaining ground This new edition discusses several examples of certificate programs that are emerging in organizations both old and new Understanding the relationship between quality and profit probably will not save traditional newspapers but Meyer argues that such knowledge can guide new media enterprises He believes that we have the tools to sustain high quality journalism and preserve its unique social functions though in a transformed way

Buying Military Transformation Peter J. Dombrowski,Eugene Gholz,2006 In Buying Military Transformation Peter Dombrowski and Eugene Gholz analyze the United States military s ongoing effort to capitalize on information technology New ideas about military doctrine derived from comparisons to Internet Age business practices can be implemented only if the military buys technologically innovative weapons systems Buying Military Transformation examines how political and military leaders work with the defense industry to develop the small ships unmanned aerial vehicles advanced communications equipment and systems of systems integration that will enable the new military format Dombrowski and Gholz s analysis integrates the political relationship between the defense industry and Congress the bureaucratic relationship between the firms and the military services and the technical capabilities of different types of businesses Many government officials and analysts believe that only entrepreneurial start up firms or leaders in commercial information technology markets can produce the new network oriented military equipment But Dombrowski and Gholz find that the existing defense industry will be best able to lead military technology development even for equipment modeled on the civilian Internet The U S government is already spending billions of dollars each year on its military transformation program money that could be easily misdirected and wasted if policymakers spend it on the wrong projects or work with the wrong firms In addition to this practical implication Buying Military Transformation offers key lessons for the theory of Revolutions in Military Affairs A series of military analysts have argued that major social and economic changes like the shift from the Agricultural Age to the Industrial Age inherently force related changes in the military Buying Military Transformation undermines this technologically determinist claim commercial innovation does not directly determine military

innovation instead political leadership and military organizations choose the trajectory of defense investment Militaries should invest in new technology in response to strategic threats and military leaders professional judgments about the equipment needed to improve military effectiveness Commercial technological progress by itself does not generate an imperative for military transformation Clear cogent and engaging *Buying Military Transformation* is essential reading for journalists legislators policymakers and scholars
