The Geographies of African American Short Fiction Kenton Rambsy, 2022-03-25 Perhaps the brevity of short fiction accounts for the relatively scant attention devoted to it by scholars who have historically concentrated on longer prose narratives *The Geographies of African American Short Fiction* seeks to fill this gap by analyzing the ways African American short story writers plotted a diverse range of characters across multiple locations small towns a famous metropolis city sidewalks a rural wooded area apartment buildings a pond a general store a prison and more In the process these writers highlighted the extents to which places and spaces shaped or situated racial

Rooted in the Earth Dianne D. Glave, 2010-08 With a basis in environmental history this groundbreaking study challenges the idea that a meaningful attachment to nature and the outdoors is contrary to the black experience The discussion shows that contemporary African American culture is usually seen as an urban culture one that arose out of the Great Migration and has

contributed to international trends in fashion music and the arts ever since However because of this urban focus many African Americans are not at peace with their rich but tangled agrarian legacy On one hand the book shows nature and violence are connected in black memory especially in disturbing images such as slave ships on the ocean exhaustion in the fields dogs in the woods and dead bodies hanging from trees In contrast though there is also a competing tradition of African American stewardship of the land that should be better known Emphasizing the tradition of black environmentalism and using storytelling techniques to dramatize the work of black naturalists this account corrects the record and urges interested urban dwellers to get back to the land
