THE LAST QUESTION

by ISAAC ASIMOV

(author of "Living Space")

Illustrated by LUTON

THE LAST QUESTION was asked for the first time, half in jest, on May 21, 2061, at a time when humanity first stepped into the light. The question came about as a result of a five-dollar bet over high-balls and it happened this way:—

Alexander Adell and Bertram Lupov were two of the faithful attendants of Multivac. As well as any human beings could, they knew what lay behind the cold, clicking, flashing face—eyes and miles of face—of that giant computer. They had at least a vague notion of the general plan of relays and circuits that had long since grown past the point where any single human could possibly have a firm grasp of the whole.

Multivac was self-adjusting and self-correcting. It had to be; nothing human could adjust and correct it quickly enough, or even adequately enough. —So Adell and Lupov attended the monstrous giant only lightly and super-

ficially, yet as well as any man could. They fed it data, adjusted questions to its needs, and translated the answers that were issued. Certainly they, and all others like them, were fully entitled to share in the glory that was Multivac's.

For decades, Multivac had helped design the ships and plot the trajectories that enabled man to reach the Moon, Mars and Venus. Beyond Mars, Earth's poor resources could not support the ships; too much energy was needed for the long trips. Earth exploited its coal and uranium with increasing efficiency, but there was only so much of both.

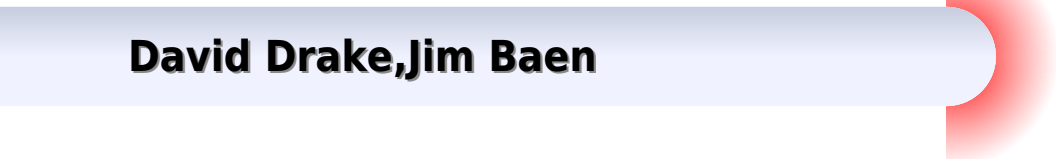

And slowly, Multivac learned enough to answer deeper questions more fundamentally; and on May 14, 2061, what had been theory, became fact.

The energy of the sun was stored, converted, and utilized directly on a planet-wide scale. All earth turned off its burning coal, its flickering tra-

The Last Question By Isaac Asimov:

The Greenie's Guide to the End of the World Theodore McCall, 2011 There is an old fundamentalist argument that the world will eventually be destroyed in the Apocalypse so there is no point in caring for it When one reads about the delicate balance of the first moments of the cosmos one can only marvel at the process which brought about the existence of the earth and the creatures that inhabit it One of Theo McCall's joys in life is cycling He lives in the city of Adelaide South Australia a perfect city for cycling When he first began this project once or twice a week he would cycle in the early morning The last part of the return trip would involve riding eastwards into the rising sun Whenever he felt the warmth of the sun on his face and was aware of its sheer power and energy he was convinced that the universe is an overwhelmingly beautiful place which God would never abandon or destroy It is with this complete faith in God's love for creation that he set out to write an account of how this creation with all its beauty and fragility as well as its flaws and scars might be transformed into God's new creation Given the ecological crisis that we face how can we meaningfully talk about the consummation of all things without removing the impetus for ecological action In other words is it possible to develop an ecological eschatology

Hyperspace Michio Kaku, 2016 Reissued in new covers this is the runaway bestseller from one of the world's leading theoretical physicists Are there other dimensions beyond our own Is time travel possible Michio Kaku takes us on a tour of the most exciting work in modern physics including research into the 10th dimension time warps and multiple universes to outline what may be the leading candidate for the Theory of Everything **The World Turned Upside Down** David Drake, Jim Baen, 2005-01-01 GET READY FOR A GIANT MIND EXPANDING DOSE OF THE BEST SCIENCE FICTION EVER WRITTEN BY THE GREATEST SCIENCE FICTION WRITERS OF ALL TIME When readers first encounter science fiction they find adventures on other planets and in future worlds explorations of future technology and its implications and extrapolations of social trends and warnings of where they may lead but they also encounter concepts heretofore undreamed of and the impact on the readers' thinking does nothing less than turn their world upside down Now David Drake Jim Baen and Eric Flint gather together some of the greatest science fiction ever written in one volume with each story chosen for a startling breakthrough concept which left readers stunned and changed the course of science fiction In the Golden Age of science fiction the science fiction magazines weren't given titles such as Astounding Amazing Startling etc for nothing Pick up this generous serving of the very best of science fiction and prepared to be astounded amazed startled and entertained At the publisher's request this title is sold without DRM Digital Rights Management **Lucy and David and the God**

Equation Alan McKenzie, 2011 Lucy a first year physics undergraduate joins forces with David a final year postgraduate student in theoretical physics to crack the ultimate problem why do laws exist that allow the creation of the universe and even the whole multiverse On the journey they confront their own beliefs but the gap between them may be too great for them to admit their growing attraction for each other Singularities Joshua Raulerson, 2013 This groundbreaking volume is

the first to mount a sustained and wide ranging critical treatment of Singularity the irrevocable transformation of the nature of human existence by technological advancement as a subject for theory and cultural studies

At the Edge of Uncertainty Michael Brooks, 2014-06-26 The atom The Big Bang DNA Natural selection All ideas that have revolutionised science and that were dismissed out of hand when they first appeared The surprises haven't stopped here Michael Brooks bestselling author of 13 Things that Don't Make Sense investigates the new wave of unexpected insights that are shaping the future of scientific discovery Through eleven radical new insights Brooks takes us to the extreme frontiers of what we understand about the world He journeys from the observations that might rewrite our history of the universe through the novel biology behind our will to live and on to the physiological root of consciousness Along the way he examines how the underrepresentation of women in clinical trials means that many of the drugs we use are less effective on women than men and more likely to have adverse effects explores how merging humans with other species might provide a solution to the shortage of organ donors and finds out if there is such a thing as the will to live When we think about science we often think of iron clad facts But today more than ever our unshakeable truths have been shaken apart As Michael Brooks reveals the best science is about open mindedness imagination and a love of mind boggling adventures at the edge of uncertainty

All Brain and No Soul? Robert A. Hunt, 2025-02-24 All Brain and No Soul Real Humanity in an AI Age explores the profound shifts in human identity and understanding in the context of historical scientific and technological revolutions particularly the rise of artificial intelligence Beginning with the author's personal reflections on chaos and order in a changing world it delves into humanity's displacement from the cosmic center through the Copernican Revolution the evolution of modern science and the redefining of intelligence and sentience The narrative examines humanity's role within an expanding indifferent universe and the implications of Darwin's theories on our relationship with nature and other species It interrogates how technological advancements like AI and brain computer interfaces reshape human self perception and blur boundaries between machines and humans The book highlights the dangers of abstracting humanity into algorithms and idealized digital personas Through a lens of history religion and philosophy the author raises questions about what it means to be human in a world increasingly mediated by screens algorithms and artificial intelligences urging readers to reflect on the balance between technological progress and retaining authentic human connections

Three Creation Stories Michael Gold, 2018-11-08 What is reality Is reality both mind and matter body and soul as taught by Western religions such as Judaism Christianity and Islam This is dualism the approach of philosophers from Plato to Descartes Or is reality only matter as taught by many modern scientists and philosophers This is materialism the approach of philosophers from Hobbes to Marx Or is reality only mind as taught by Eastern religions and Western mystics This is the approach of philosophers from Berkeley to Whitehead The beginning of Genesis allows for multiple translations and interpretations We will read the creation story in Genesis from the point of view of each of these three approaches dualism materialism and idealism In doing so we will tell three very different creation
