The Drama of the Double Katherine H. Burkman, 2016-04-29 This book explores the way in which doubling takes place in several novels films and dramas primarily focusing on modern drama and exploring how five Greek myths Oedipus Narcissus Dionysus Orestes and Demeter inform the literature Taking a psychological mythical approach this book explores the inner divisions that lead to boundary loss and the search for the self that may lead to boundaries found The contention of the book is that the oedipal search for self has been replaced in modern literature by individuals caught up in a narcissistic culture Katherine H Burkman explores plays by Aeschylus Sophocles Euripides Henrik Ibsen Eugene O'Neill Samuel Beckett Harold Pinter David Mamet Sam Shepard Marsha Norman and Will Eno **The Publishers Weekly**, 2009 Critical Practice Martin McQuillan, 2019-02-21 What is the relationship between theory and practice in the creative arts today In Critical Practice Martin McQuillan offers a critical interrogation of the idea of practice led research He goes beyond the recent vocabulary of research management to consider the more interesting question of the emergence of a cultural space in which philosophy theory history and practice are becoming indistinguishable McQuillan considers the work of a number of writers and thinkers who cross the divide between theoretical and creative practice including Alain Badiou and Terry Eagleton and the longer tradition of theory writing that runs through the work of H L de Cixous Roland Barthes and Louis Althusser His aim is to elucidate the contemporary ramifications of a relationship that has been contested throughout the long history of philosophy from Plato's dialogues to Derrida's *Envois* *The New Yorker* Harold Wallace Ross, William Shawn, Tina Brown, David Remnick, Katharine Sergeant Angell White, Rea Irvin, Roger Angell, 2008-08 **Talking Book Topics**, 2013-07

Islands in the Cosmos Dale A. Russell, 2009-07-14 How is it that we came to be here The search for answers to that question has preoccupied humans for millennia Scientists have sought clues in the genes of living things in the physical environments of Earth from mountaintops to the depths of the ocean in the chemistry of this world and those nearby in the tiniest particles of matter and in the deepest reaches of space In *Islands of the Cosmos* Dale A Russell traces a path from the dawn of the universe to speculations about our future on this planet He centers his story on the physical and biological processes in evolution which interact to favor more successful and eliminate less successful forms of life Marvelously these processes reveal latent possibilities in life's basic structure and propel a major evolutionary theme the increasing proficiency of biological function It remains to be seen whether the human form can survive the dynamic processes that brought it into existence Yet the emergence of the ability to acquire knowledge from experience to optimize behavior to conceptualize to distinguish good from bad behavior all hint at an evolutionary outcome that science is only beginning to understand
