*An Analysis of Francis Fukuyama's The End of History and the Last Man* Ian Jackson, Jason Xidias, 2017-07-05 Francis Fukuyama's controversial 1992 book *The End of History and the Last Man* demonstrates an important aspect of creative thinking the ability to generate hypotheses and create novel explanations for evidence In the case of Fukuyama's work the central hypothesis and explanation he put forward were not in fact new but they were novel in the academic and historical context of the time Fukuyama's central argument was that the end of the Cold War was a symptom of and a vital waypoint in a teleological progression of history Interpreting history as teleological is to say that it is headed towards a final state or end point a state in which matters will reach an equilibrium in which things are as good as they can get For Fukuyama this would mean the end of mankind's ideological evolution and the universalization of Western liberal democracy as the final form of human government This grand theory which sought to explain the end of the Cold War through a single overarching hypothesis made the novel step of resurrecting the German

philosopher G W F Hegel s theory of history which had long been ignored by practical historians and political philosophers and applying it to current events      **Summary of Francis Fukuyama's End of History and the Last Man** Everest

Totalitarianism is a concept developed in the West after World War II to describe the Soviet Union and Nazi Germany which were tyrannies of a very different nature from the traditional authoritarianisms of the nineteenth century 2 The idea that the Soviet Union was trying to create a new type of man who was not only free of his freedom but also afraid of it was illustrated by the book One Flew Over the Cuckoo s Nest which centers around the inmates of an insane asylum who lead lives of childish inanity under the eyes of a tyrannical Big Nurse 3 In the early 1980s the Chinese communist leadership began permitting peasants who made up 80 percent of the country s population to grow and sell their own food In 1986 the Soviet press began to publish articles critical of the crimes of the Stalin era 4 The most basic weakness of the Soviet system was economic It was much more difficult to tolerate economic failure in the Soviet system because the regime had explicitly based its claims to legitimacy on its ability to deliver its people a high material standard of living      *The Search for Arab*

*Democracy* Larbi Sadiki,2004 Larbi Sadiki deploys the conceptual tools of contemporary Western political philosophy and theory to articulate some provocative theses Her book challenges Eurocentric conceptions of democracy that frequently display a lack of concern for specificity and context analyzes and interrogates Orientalist and Occidental discourses on democracy and considers justifications for democracy in the global arena giving space for self representation by women and Islamists among others      **The Ends of History** Amy Swiffen,Joshua Nichols,2013-05-02 The Ends of History considers how despite the fact that events in the past 20 years have called Francis Fukuyama s infamous announcement of the end of history into question the issue of the end of history is now a matter of renewed interest and debate Two decades ago we were confronted by the end of the Soviet Union and collapse of the geo political divisions that had defined much of the twentieth century From this particular end the end of history was proclaimed But is it still possible to argue that liberal democracy and free market capitalism are the final form of law and mode of production in human history Recent events have called this thesis into question from 9 11 and the War on Terror to the current global economic collapse and looming ecological crises it seems that history is far from over And yet oddly enough the question of the end has returned For example in the often predicted but still uncertain establishment of either a new international American Empire or a new era of International Law and the global resurgence of religion as a dominant source of political identification On the other hand perhaps the end is still yet to come slowly accumulating mustering at the periphery of the geo political landscape and outside the productive sphere Responses taking up these questions range from a return to Universalism political theology Messianism and even the old specter of communism This volume assesses these responses exploring what is at stake in proclaiming the end in the current historical moment Is it a matter of reading the writing on the wall Or is the proclamation itself a political act

Furthermore is there a desire for the end In addressing these questions the contributors to *The Ends of History* confront the various ends that we now live and in so doing they open new lines of sight into the future **The Killing of History** Keith Windschuttle,1996 This book is a critique of the major developments over the last decade in the writing of history the emergence of post structuralist and postmodernist approaches to the study of the past *Constitutional Change in the Contemporary Socialist World* Ngoc Son Bui,2020 Comparative constitutional law has a long and distinguished history in intellectual thought and in the construction of public law As political actors and the people who create or modify their constitutional orders they often wish to learn from the experience and learning of others This cross fertilization and mutual interaction has only accelerated with the onset of globalization which has transformed the world into an interconnected web that facilitates dialogue and linkages across international and regional structures Oxford Comparative Constitutionalism seeks to publish scholarship of the highest quality in constitutional law that deepens our knowledge of local national regional and global phenomena through the lens of comparative public law Book jacket *The Thought Remolding Campaign of the Chinese Communist Party-state* Hu Ping,2012 In its comprehensive analysis of a wide range of primary and secondary sources in both Chinese and Western languages this authoritative work stands as the definitive study of the theory implementation and legacy of the Chinese Communist Party s thought remolding campaign This decades long campaign involved the extraction of confessions from millions of Chinese citizens suspected of heterodoxy or disobedience to party dictates along with their subjection to various forms of re education and indoctrination Hu Ping s carefully structured overview provides a valuable insider s perspective and supersedes the previous landmark study on this vastly interesting topic **Fifty Key Thinkers in International Relations** Martin Griffiths,1999 This unique reference offers a quick and convenient overview of the key thinkers in international relations in the twentieth century The inclusive coverage ranges from politicians such as Lenin and Kissinger to the most influential figures in feminism nationalist studies and even historical sociology Each entry describes the main elements of each thinker s contribution to the study of international relations provides relevant information on his or her life and career and lists valuable suggestions for further reading and critical analysis Political science and journalism students media professionals and anyone with an interest in modern international relations will want this useful work *From Above and Below* Craig Livingston,2013-06-01 2014 Best International Book Award Mormon History Association For the first century of their church s existence Mormon observers of international events studied and cheered global revolutions as a religious exercise As believers in divine human co agency many prominent Mormons saw global revolutions as providential precursors to the imminent establishment of the terrestrial kingdom of God French Revolutionary symbolism socialist critiques of industrialism American Indian nationalism and Wilsonian internationalism all became the raw materials of Mormon millennial theologies which were sometimes barely distinguishable from secular utopianism Many Mormon thinkers accepted secular revolutionary arguments that the old world order needed

to be destroyed not merely reformed to clear the way for the new In From Above and Below author Craig Livingston tells the story of Mormon commentary on global revolutions from the European revolutions of 1848 to the collapse of Mormon faith in progress in the 1930s when revolutionary communist and fascist regimes exposed themselves as violent and repressive As the Church bureaucratized and assimilated to mainstream American and capitalist values Mormons became champions of the conservative view of political and social development for which they are known today The first Mormon converts in Mexico and France both political radicals would scarcely recognize the arch conservative twenty first century Church

**The Tribal Imagination** Robin Fox,2011-07-01 Fox traces our ongoing struggle to maintain open societies in the face of profoundly tribal human needs that paradoxically hold the key to our survival This latest book ranges from incest and arranged marriage to poetry and myth from human rights and vengeance to pop icons such as Seinfeld

*Apocalypse Now?* Professor Duncan B Forrester,2013-05-28 How may people of faith respond wisely constructively and courageously to the challenges of a time of terror How might religious reasons in public debate be a force for reconciliation rather than violence and hatred In a world in which religious arguments and religious motivations play such a huge public role there is an urgent responsibility for interpreting what is happening and engaging with religious views which are commonly regarded as alien threatening or dangerous In *Apocalypse Now* Duncan Forrester argues that disorders and atrocities which include the Gulag the Holocaust 9 11 the Afghanistan and Iraq wars and the Tsunami disaster have shown us that we stand not at the end of history but in the midst of an apocalyptic age of terror which has striking similarities to the time in which Christianity was born Moving between two times of terror the early Centuries of Christianity and today Forrester asks how religious motivations can play a positive role in the midst of conflicts and disasters Reading the signs of the times to try to understand what is happening in today s age of terror Forrester argues that there are huge resources in the Christian tradition that can be productively deployed for a more constructive and faithful response We are at a turning point this is a book which should be read
