How to Live Forever
Stephen R. L. Clark, 2008-01-28. Immortality is a subject which has long been explored and imagined by science fiction writers. In his intriguing new study, Stephen R. L. Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy. He reveals how fantasy accounts of issues such as resurrection, disembodied survival, reincarnation, and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth. *How to Live Forever* is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work. It includes extensive suggestions for further reading, both fictional and philosophical, and examines the work of such major science fiction authors as Arthur C. Clarke, Frank Herbert, Larry Niven, William Gibson, and Colin Wilson.

Stories Are Weapons
Annalee Newitz, 2024-06-04. One of *Publishers Weekly's* Top 10 Politics/Current Events books of Spring 2024, Newitz is so skillful at elucidating such a tangled, morally contentious history that I never felt lost. Jennifer Szalai, *New York Times*. A sharp and timely exploration of the dark art of manipulation through weaponized storytelling from the best-selling author of *Four Lost Cities*. In *Stories Are Weapons*, best-selling author Annalee Newitz traces the way disinformation, propaganda, and violent threats—the essential tool kit for psychological warfare—have evolved from military weapons deployed against foreign adversaries into tools in domestic culture wars. Newitz delves into America's deep-rooted history with psychological operations, beginning with Benjamin Franklin's Revolutionary War-era fake newspaper and nineteenth-century wars on Indigenous nations, and reaching its apotheosis with the Cold War and twenty-first-century influence campaigns online. America's secret weapon has long been coercive storytelling. And there's a reason for that: operatives who shaped modern psychological warfare drew on their experiences as science fiction writers, and in the advertising industry. Now, through a weapons transfer program long unacknowledged, psyops have found their way into the hands of culture warriors, transforming democratic debates into toxic wars over American identity. Newitz zeroes in on conflicts over race and intelligence, school board fights over LGBT students, and campaigns against feminist viewpoints, revealing how, in each case,

specific groups of Americans are singled out and treated as enemies of the state Crucially Newitz delivers a powerful counternarrative speaking with the researchers and activists who are outlining a pathway to achieving psychological disarmament and cultural peace Incisive and essential Stories are Weapons reveals how our minds have been turned into blood soaked battlegrounds and how we can put down our weapons to build something better **This Is Not a Science Fiction Textbook** Mark Bould, Steven Shaviro, 2024-02-06 Science fiction as a vital bridge between technoscience and culture an early warning system a method for imagining differently In the new millennium science fiction has moved from the margins to the mainstream At the same time it has undergone massive transformations No longer can it be derided as indigestible technobabble or escapist trash or a white man's playground not that it ever really was Sf is rich and diverse serious and fun A vital bridge between technoscience and culture it is an early warning system a method for imagining differently and a way of experiencing our increasingly science fictional world It is the vernacular of the 21st century This Is Not A Science Fiction Textbook brings together leading sf scholars including some of the most exciting new critical voices to introduce the genre for the general reader Its first part outlines some key ideas used to think about sf such as Estrangement Extrapolation and Alterity Its second part maps some of the genre's global history from the Enlightenment and European colonialism to Indigenous and African Futurisms Its third part surveys sf at the turn of the 2020s organised by concepts movements and new academic disciplines from Afrofuturism and Animal Studies to Queer Theory and the Weird and each chapter whether it is on Climate Fiction or Neurodiversity is accompanied by an introduction to a major contemporary novel and film **Skiffy and Mimesis** Damien Broderick, 2010-05-01 This second anthology of the best of Australian SF Review includes pieces by Gregory Benford Janeen Webb Lucius Shepard Jenny Blackford George Turner Yvonne Rousseau Douglas Barbour and others writing about Watchmen cyberpunk steampunk Philip K Dick Ursula K Le Guin Kim Stanley Robinson and Lucius Shepard Complete with introduction bibliography and index
