National Library of Medicine Current Catalog National Library of Medicine (U.S.),1992 Banana: Genomics and Transgenic Approaches for Genetic Improvement Sukhada Mohandas,Kundapura V. Ravishankar,2016-09-08 Bananas and plantains are among the most important food and cash crops in the world They are cultivated in more than 135 countries across the tropics and subtropics with an annual global production of ca 130 million metric tonnes Though bananas are one of the most important components of food security in many developing countries banana production is threatened by both abiotic and biotic stresses These include a wide range of diseases and pests such as bunchy top virus burrowing nematodes black Sigatoka or black leaf streak Fusarium wilt etc In recent years considerable progress has been made and several biotechnological and genomic tools have been employed to help understand and unravel the mysterious banana genome Molecular and genomic studies have helped to decipher the Musa genome and its evolution Genetic linkage map and whole genome sequencing of both Musa acuminata and Musa balbisiana progenitors of cultivated banana have completely changed the way of thinking and the approach on banana crop improvement Whole genome sequencing has helped to improve the selection of quantitative traits such as yield as well as the selection of optimal parents for developing required hybrids in breeding programs Gene isolation and the analysis of mutants have helped in the characterization of genes of agronomic value and the associated regulatory sequences With the advent of molecular markers and new statistical tools it is now possible to measure the diversity identify genes and useful alleles linked to important agronomic traits Further these alleles can be incorporated into cultivars through marker assisted selection or through transgenic approach Transgenic approaches are potential tools for direct transfer of these genes into popular cultivars which are generally not amenable for conventional breeding techniques in specific with crops such as bananas which are sterile triploid and heterozygous thereby making it difficult to reconstruct the recurrent genotypes in banana Transgenic techniques thus have helped overcome the difficulty of working with sterile triploid banana crop In the last five years enormous amount of new information and techniques have been generated for banana A comprehensive book entitled Banana Genomics and Transgenic Approaches for Genetic improvement on banana genomics latest transgenic technologies and tools available for improved crop development in banana will address all these requirements **National Union Catalog, 1981** ,1982 National Union Catalog ,1982 Includes entries for maps and atlases *Progress in Botany Vol. 79* Francisco M. Cánovas,Ulrich Lüttge,Rainer Matyssek,2017-11-27 With one volume each year this series keeps scientists and advanced students informed of the latest developments and results in all areas of the plant sciences The present volume includes reviews on plant physiology biochemistry genetics ecology and ecosystems **Climate-Environment Interactions under Global Warming, volume II** Hainan Gong,Haipeng Yu,Zhiyuan Hu,Qinjian Jin,2025-03-07 During recent decades the global climate and environment have experienced unprecedented changes Much evidence indicates that the global surface temperature is increasing rapidly

especially in the Arctic and extreme climate and environmental events are frequently occurring Climate and environmental changes not only have a great impact on society and the economy but also seriously exert far reaching impacts on both human lives and health Therefore revealing the mechanisms behind the climate and environmental changes is critical to advancing our understanding and predicting of the global climate and environmental changes and their impacts Climate change can cause environmental change and environmental change may in turn affect climate change For example the faster Arctic warming can change the mid latitude large scale atmospheric circulation and further modulate the regional air quality through transport and diffusion Conversely the air pollution associated with industrial activities may also affect the regional and global climate through the complicated aerosol climate interaction The limited understanding of these feedback and interactions adds uncertainty to predicting the future evolution of the climate and environment *Catalog of Copyright Entries* Library of Congress. House,2012 Some vols include supplemental journals of such proceedings of the sessions as during the time they were depending were ordered to be kept secret and respecting which the injunction of secrecy was afterwards taken off by the order of the House **Climate-Resilient Horticulture: Adaptation and Mitigation Strategies** Harish Chandra Prasad Singh,Nadipynayakanahally Krishnamurthy Sriniv Rao,Kodthalu Seetharamaiah Shivashankar,2013-03-15 Climate change a global phenomenon has attracted scientists to contribute in anticipatory research to mitigate adverse impacts which are more important for horticulture considering that the scenario is in the midst of revolution reaching the production level of 250 million tonnes in India Impacts of climate variability have invariably profound influence on production and quality An understanding of the impacts and relevant adaptation strategies are of foremost importance to sustain the productivity and profitability of horticulture crops in the climate change scenario which necessitates synthesis of current knowledge to develop strategies for adaptation and mitigation to achieve climate resilient horticulture The book Climate resilient horticulture adaptation and mitigation strategies addresses the effects of climate change on different horticultural crops and focuses on the adaptation strategies based on the scientific knowledge generated by the experts in different agro climatic regions in India Issues have been covered in various chapters to make this book a treasure of knowledge in horticulture vis a vis climate change Some of the crops included in the book are apple grapes cashew banana litchi mango coconut oil palm potato tomato cucurbits and flowers In addition to strategies to be adapted in these crops various other important aspects like carbon sequestration pests and diseases and urban landscaping are also covered in the book Information on climatic risks and adaptation options for resilience in horticultural crops and future strategies and information on pest and disease dynamics on horticultural crops in relation to climate change and available mitigation strategies have also been documented The book is edited by Dr H P Singh a visionary leader and his colleagues which will be highly valuable to research workers students policy planners and farmers to understand and checkmate the adverse effect of

climate change so as to convert weakness into opportunity *Bibliography of Agriculture* ,1975 **Abiotic Stress Responses in Plants** Parvaiz Ahmad,M.N.V. Prasad,2011-11-16 Abiotic stress cause changes in soil plant atmosphere continuum and is responsible for reduced yield in several major crops Therefore the subject of abiotic stress response in plants metabolism productivity and sustainability is gaining considerable significance in the contemporary world Abiotic stress is an integral part of climate change a complex phenomenon with a wide range of unpredictable impacts on the environment Prolonged exposure to these abiotic stresses results in altered metabolism and damage to biomolecules Plants evolve defense mechanisms to tolerate these stresses by upregulation of osmolytes osmoprotectants and enzymatic and non enzymatic antioxidants etc This volume deals with abiotic stress induced morphological and anatomical changes aberrations in metabolism strategies and approaches to increase salt tolerance managing the drought stress sustainable fruit production and postharvest stress treatments role of glutathione reductase flavonoids as antioxidants in plants the role of salicylic acid and trehalose in plants stress induced flowering The role of soil organic matter in mineral nutrition and fatty acid profile in response to heavy metal stress are also dealt with Proteomic markers for oxidative stress as a new tools for reactive oxygen species and photosynthesis research abscisic acid signaling in plants are covered with chosen examples Stress responsive genes and gene products including expressed proteins that are implicated in conferring tolerance to the plant are presented Thus this volume would provides the reader with a wide spectrum of information including key references and with a large number of illustrations and tables Dr Parvaiz is Assistant Professor in Botany at A S College Srinagar Jammu and Kashmir India He has completed his post graduation in Botany in 2000 from Jamia Hamdard New Delhi India After his Ph D from the Indian Institute of Technology IIT Delhi India in 2007 he joined the International Centre for Genetic Engineering and Biotechnology New Delhi He has published more than 20 research papers in peer reviewed journals and 4 book chapters He has also edited a volume which is in press with Studium Press Pvt India Ltd New Delhi India Dr Parvaiz is actively engaged in studying the molecular and physio biochemical responses of different plants mulberry pea Indian mustard under environmental stress Prof M N V Prasad is a Professor in the Department of Plant Sciences at the University of Hyderabad India He received B Sc 1973 and M Sc 1975 degrees from Andhra University India and the Ph D degree 1979 in botany from the University of Lucknow India Prasad has published 216 articles in peer reviewed journals and 82 book chapters and conference proceedings in the broad area of environmental botany and heavy metal stress in plants He is the author co author editor or co editor for eight books He is the recipient of Pitamber Pant National Environment Fellowship of 2007 awarded by the Ministry of Environment and Forests Government of India *Cumulated Index Medicus* ,1964 **Index Medicus** ,2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings **Planthoppers** R. F. Denno,John R. Perfect,2012-12-06 Planthoppers include some of the most devastating pests of major agricultural crops throughout the world One species the rice brown planthopper is among the most economically important pests in Asia In past decades

government policies encouraged the control of rice planthoppers with synthetic pesticides a tactic which promoted insecticide resistance and often led to the pesticide induced resurgence of pest populations To deter planthopper outbreaks a more ecologically sound management strategy is being implemented one based on a thorough investigation of population dynamics natural enemies and the genetics of host plant and insecticide adaptation In the natural habitats of North America and Europe scientists have also used planthoppers as model organisms to test ecological and evolutionary theory The consequence of these diverse studies is an extremely scattered literature on planthoppers that has never been synthesized from an ecological perspective This volume summarizes what is known about planthopper ecology and biological control It takes a theoretical approach yet is deeply concerned with the application of theory to the practical problems of pest management

Bibliography of Agriculture with Subject Index ,1993-11 **Growth Patterns Underlying Plant Development** Daniel Kierzkowski,Edwige Moyroud,Takumi Higaki,Krzysztof Wabnik,Yuling Jiao,2022-09-22 **Biennial Report** California. Department of Justice,1991 **Food Packaging and Preservation** M. Mathlouthi,2013-12-14 This book is an updating of Food Packaging and Preservation Theory and Practice published in 1986 by Elsevier Applied Science Since that date many things have changed in the world Hence the name given to the first IFTEC meeting held at the Hague NL November 15 18 1992 Food Technology for a Changing World Is the world changing for better or worse and what can food technology improve The keynote lecture of the IFTEC meeting dealt with hunger and the challenge it represents to food science and technology In the preface to the 1986 book it was suggested that food packaging could solve some of the problems of crop preservation in countries where starvation is prevalent However such thoughts did not solve any problems The famine is still spreading in Africa The unbalanced north south situation evoked in the 1986 preface has not improved The international market of foods and agricultural products is constantly changing and food packaging scientists can only explore new ways to help cope with this Some of these ideas are approached in this book particularly in chapters 9 10 and 12

Phytophthora Infestations in Forest Ecosystems Bruno Scanu,Thomas Jung,2021-06-02 The oomycete genus *Phytophthora* represents one of the most notorious groups of tree pathogens in natural and semi natural forest ecosystems Since the discovery in the 1960s of the invasive *P. cinnamomi* threatening some of the world s richest plant communities in Australia numerous *Phytophthora* diseases have been reported on forest trees worldwide which were previously unknown to science The most notable examples include the oak and beech declines triggered by different *Phytophthora* spp in Europe and North America the findings of sudden oak death and sudden larch death caused by *P. ramorum* in the Western USA and the U K respectively and the association of *P. austrocedri* with mal del cipr s in Argentina and juniper decline in the U K All

these epidemic events are driven by exotic invasive *Phytophthora* species introduced through infested nursery plants from their native overseas environments In recent years many independent surveys have studied the diversity of *Phytophthora* species and the diseases they are causing across a diverse range of forests and other natural ecosystems This Special Issue presents papers on *Phytophthora* surveys performed in different biogeographic regions and addresses the pathways and ecological and economic impacts of these invasive forest pathogens
