Volume 7B The last ten years have seen explosive growth in the technology available to the collision analyst changing the
way reconstruction is practiced in fundamental ways The greatest technological advances for the crash reconstruction
community have come in the realms of photogrammetry and digital media analysis The widespread use of scanning
technology has facilitated the implementation of powerful new tools to digitize forensic data create 3D models and visualize
and analyze crash vehicles and environments The introduction of unmanned aerial systems and standardization of crash data
recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the
components of a crash reconstruction Because of the technological changes occurring in the industry many SAE papers have
been written to address the validation and use of new tools for collision reconstruction Collision Reconstruction
Methodologies Volumes 1 12 bring together seminal SAE technical papers surrounding advancements in the crash
