Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances. In developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxian perspectives, Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization, political economy, Marxism, and sociology of work.

The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA'S TOP BOOKS OF THE YEAR Shortlisted for The Orwell Prize 2020 Shortlisted for the FT Business Book of the Year Award 2019 Easily the most important book to be published this century, I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas. Zadie Smith, The Guardian. The challenges to humanity posed by the digital future: the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century. Our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits. **The Age of Surveillance Capitalism** is a deeply

reasoned examination of the threat of unprecedented power free from democratic oversight As it explores this new capitalism's impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization Most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves *Multinational Enterprises and Host Country Development* Holger Görg, 2016-06-24 *Multinational Enterprises and Host Country Development* is a unique collection of papers looking at different aspects of the link between multinational enterprises and their effects on the host countries economies The volume studies effects of multinationals on R D innovation productivity wages as well as growth and survival of firms in the host countries and distinguishes direct and indirect effects through spillovers All the analyses are conducted using firm level data for countries as diverse as China Ireland Sweden Ghana the UK or a group of countries in Central and Eastern Europe This volume is a valuable reading for graduate students and researchers wishing to investigate the impact of multinationals
