Wise,2001 The MiG 29 Fulcrum is acknowledged as the finest lightweight multi role fighter ever produced in Russia It was designed to operate under wartime conditions and fight head to head with Western combat aircraft such as the U S F 16 Falcon F A 18 Hornet French Mirage 2000 Rafale and Swedish JAS 39 Grippen Roughly the size of the F A 18 Hornet the Mach 2 3 capable Fulcrum has also demonstrated many extraordinary capabilities and set several world records including topping the Lockheed SR 71 Blackbird in altitude Presently in service with the Russian Air Force as well as the air forces of Georgia Ukraine Moldova India Germany Yugoslavia Serbia Iraq Czech Republic Slovakia Syria Poland Malaysia Hungary and Yemen the MiG 29 has proved to be a rugged and capable fighter that will continue to be a factor in future conflicts both as ally or foe It is with this in mind that MiG 29 Flight Manual Unclassified was created to provide a rare and unprecedented glimpse inside a top Russian aircraft Using information that only a few years ago was highly classified this translated text presents an extraordinary look at the capabilities and complexities of one of the very best fighters of the current age *Air Force Magazine* ,2002 **Douglas A-4 Skyhawk** Jim Winchester,2004-09-30 A detailed look at the combat aircraft designed by the legendary Edward H Heinemann with one role

in mind tactical nuclear delivery The Skyhawk first entered service with the US Navy almost 50 years ago It is still in service with various US units and remains the backbone of many of the air forces of those countries to which it has been exported Heinemann s Hot Rod was never called upon for its original purpose nuclear delivery from aircraft carriers but its well designed airframe proved adaptable to many other uses This is an in depth look at the design production evolution operation and performance of the aircraft It will also include first hand accounts of flying the Skyhawk in action **Flying Safety**

,1998 **Phantom from the Cockpit** Peter Caygill,2006-03-19 The McDonnell Douglas F 4 Phantom was the outstanding aircraft in many of the Western World s air forces during the 1960s and 70s It played a key role in the Cold War and saw action in Vietnam It first flew in 1958 and went into operation with the US Navy in 1960 During its long front line life it flew in the roles of an interceptor fighter bomber and reconnaissance aircraft Apart from giving a comprehensive overview of the Phantom s history this book looks particularly at the experiences of the Royal Air Force and Fleet Air Arm when they received a new model designed with a British Rolls Royce turbofan instead of the original American power plant All was not sweetness and light when the first trials commenced and this book traces its development and progression from being a carrier based attack aircraft flown by the Fleet Air Arm to the many successful roles it played as a land based aircraft with the RAF

Striving for Air Superiority Craig C. Hannah,2002 Annotation Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic air forces rarely has a state given equal weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War recovered briefly over Korea then slid into obsolescence during the 1950s His explanation of why America s fighter aircraft did not work in Vietnam is instructive and unsettling Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world He side steps politics and inter service rivalries to focus on the nuts and bolts of tactical air power The result is a factual informative account of how an air force first loses its way then finds its mission again **Of Those who Fly** L.
