Aldous Huxleys Hands Perception Psychedelic:

Aldous Huxley's Hands Allene Symons, 2015-12-08 Psychedelics neuroscience and historical biography come together when a journalist finds a lost photograph of Aldous Huxley and uncovers a hidden side of the celebrated author of *Brave New World* and *The Doors of Perception*. Allene Symons had no inkling that Aldous Huxley was once a friend of her father's until the summer of 2001 when she discovered a box of her dad's old photographs. For years in the 1940s and 50s her father had meticulously photographed human hands in the hope of developing a science of predicting human aptitudes and even mental illness. In the box along with all the other hand images was one with the name of Aldous Huxley on the back. How was it possible for two such unlikely people to cross paths her aircraft engineer father and the famous author? This question sparked a journalist's quest to understand what clearly seemed to be a little known interest of Aldous Huxley. Through interviews, road trips and family documents the author reconstructs a time peaking in mid 1950s Los Angeles when Huxley experimented with psychedelic substances, ran afoul of gatekeepers and advocated responsible use of such hallucinogens to treat mental illness as well as to achieve states of mind called mystical. Because the author's father had studied hundreds of hands including those of schizophrenics, he was invited into Huxley's research and discussion circle. This intriguing narrative about the early psychedelic era throws new light on one of the 20th century's foremost intellectuals, showing that his experiments in consciousness presaged pivotal scientific research underway today.

Aldous Huxley and Self-Realization Dana Sawyer, Julian Piras, Uwe Rasch, 2019 Throughout his writing career and especially in the last thirty years of his life Aldous Huxley exhibited a deep interest in human potentialities which he often described as our greatest unused natural resource. The present volume is the first book to focus on this Huxleyan core concern. It is based on presentations given at the Sixth International Aldous Huxley Symposium held in 2017 at the University of Almer, Spain. This volume collects essays by eleven scholars from eight countries that discuss Huxley's concept of human potentialities from an interdisciplinary perspective. This is another innovative feature of this book since today Huxley is mainly remembered as a novelist although only eleven of his fifty published works belong to that genre. The topics of this volume span Huxley's mature philosophy including his theories relating to the expansion of consciousness, the development of nonverbal humanities, the need to improve bioethics, the role of nature, the role of beliefs and prejudice and other subjects. These essays review Huxley's various positions, shedding light on their possible significance for today. Huxley marshalled his remarkable intellect to the project of improving the human condition and here we find an up-to-date report card of his theories and their efficacy.

Aldous Huxley and Alternative Spirituality Jake Poller, 2019-08-12 *Aldous Huxley and Alternative Spirituality* offers an incisive analysis of the full range of Huxley's spiritual interests spanning both mysticism, neo-Vedanta, Taoism, Mahayana and Zen Buddhism and Western esotericism, mesmerism, spiritualism, the paranormal. Jake Poller examines how Huxley's shifting spiritual convictions influenced his fiction such as his depiction of the body and sex and reveals how Huxley's use of psychedelic substances

affected his spiritual convictions resulting in a Tantric turn in his work Poller demonstrates how Huxley's vision of a new alternative spirituality in *Island* in which the Palanese select their beliefs from different religious traditions anticipates the New Age spiritual supermarket and traces the profound influence of Huxley's ideas on the spiritual seekers of the twentieth century and beyond **Aldous Huxley Annual** Bernfried Nugel, Jerome Meckier, 2023-08-24 Volume 22 opens with two little known Huxley writings *A Lunndon Mountaineering Essay 1914* edited by Gerhard Wagner and Huxley's contributions in French at the Paris 1933 congress on the future of the European spirit edited and translated into English by James Sexton This section is followed by a further selection of papers from the Seventh International Aldous Huxley Symposium held at Toulon in October 2021 many of them devoted to a variety of neglected Huxley issues or to the second part of the Huxley Forum entitled Aldous Huxley's Controversial Philosophical Theories An overview of the conference program can be consulted on the Internet via <https://sites.univ-tln.fr/huxley-toulon-en-program> The volume closes with further articles on Huxley's concept of the ultimate revolution on an aficionado's life long personal experience with Huxley's works and on Huxley's many sided response to Charles Dickens ***Psychedelic Modernism: Literature and Film*** Raj

Chandarlapaty, 2024-04-16 The primary purpose of *Psychedelic Modernism Literature and Film* is to trace the development of ideas and perspectives from the writing and private ambitions of 20th century modernist writers including Aldous Huxley The purpose of the book is to offer a rough chronology during which ideas were first given a literary imagination then transposed onto discussions of science and psychology and then theoretically democratized to bring fruit to a relatively de centered process where images text and interviews could re conceptualize the modern Being from an admixture of modernist historical and pop roots that could express a greater moment in the human action The work includes discussions from scientists such as Swiss chemist Albert Hofmann rock stars such as Jerry Garcia and unconfirmed mystics such as Carlos Castaneda The primary focus of this work isn't literature per se but the literary imagination as it may correspond to greater wider and more impactful goals than the writing of 20th century fiction While there is some outreach that favors de centered models such as the Beat Generation the author's primary purpose is to assemble an anthology covering the study and quests for knowledge from as many sides as could power the relative 1960s countercultural movement **High Culture**

across global ancient cultures Its focus is on the undeniable and pervasive evidence that drugs are often consumed for religious purposes Sacred Drugs touches on the presence of drugs in a number of religious traditions including Christianity Hinduism and Islam It also delves into the religious textures sensibilities and histories of psychoactive agents sometimes intersecting with these traditions sometimes with Indigenous cultures around the world and sometimes not directly related to any particular religion but instead related to more basic existential religious concerns a mortal body that suffers ages and dies but also yearns for transcendence healing and ecstasy or the desire to uncover and live true to one s identity as well as to find energizing communities that bind individuals together or how to counter chaos meaninglessness and disorder This controversial book will be the go to volume for readers interested in the complex relationship between religious life and psychoactive substances
