intelligence to synthetic biology He shows why the governance of science has become one of the biggest challenges of the twenty first century ever more prominent in daily politics and policy Whereas science is ordered around what we know and what is politics engages what we feel and what matters How can we reconcile the two so that crucial decisions are both well informed and legitimate The book proposes new ways to organize democracy and government both within nations and at a global scale to better shape science and technology so that we can reap more of the benefits and fewer of the harms Also available as an audiobook Catalog of Copyright Entries.
