

## Sociological Autobiography

When we make decisions and experience things, we often describe them as being our own, ours. However, when we think about why we made those decisions and why we experience things we come to realize that we are influenced by society to make decisions for us. There are many external societal factors that influence our beliefs and values which in turn affect how and why we make decisions. My family, friends, and society in general have heavily influenced the way I have lived my life and the person that I am today.

I was birthed into this world on January 24, 2002 in the city of San Jose, California, eyes wide open, ready to be shaped and molded into the individual that society wanted me to become. Immediately I was given the ascribed status of a girl. A quick glance was all it took to confirm what then became my gender and that was that. With this social label my parents, in result, treated me according to society's view of how a girl should be treated. This included pink and purple everything, dolls and dollhouses. It wasn't until I got a little older and would play with my cousins that that stereotype began to change. I grew up surrounded by a lot of family mainly because my culture is very family-oriented, but also because my family was so large in number.

Most of my first cousins, especially those close to my age, were male. Because many of my cousins who I played with as a child were male, I started to participate in more boy activities. For example, playing in the dirt and mud, playing basketball, and playing video games. I do not recall my parents or family ever saying anything about me participating in these activities however, I do remember an occurrence when I was in kindergarten in art class. The art teacher had assigned us an art project where we were to paint a picture for our dads for Father's Day. I decided to paint flowers for my dad because at the time he liked to garden and had all kinds of vegetables and flowers growing in our backyard. When I had told the art teacher what I was going to paint she told me to paint something else, like a car. At the time I didn't understand why I couldn't paint flowers for my dad when I knew that he would like it, but that didn't matter because flowers are girly and not meant for boys. This was just the first of my experiences with society's gender roles.

I am the youngest and only girl out of three other siblings. However, they are all half-siblings. I have two older brothers from my father and one older brother from my mother. Because of this, and because of the large age gap between my brothers and I, I never experienced that close sibling relationship with them. Being not only the youngest, but also the only girl had a huge influence on who I am today. My dad had only ever had sons, so he, in a way, treated me like another son.

He wanted me to play all kinds of sports like my brothers did. I was never an athletic person, and still am not, so I never played a

## **Sociological Autobiography Papers:**

A Fragment of a Sociological Autobiography Edward Shils, 2017-07-05 Edward Shils was one of the giants of sociological theory in the period after World War II. In this autobiography written three years before his death in 1995, Shils reflects on the remarkable range of his life's work and activities, including founding and editing the journal *Minerva*, being a central figure in the Congress of Cultural Freedom, serving as a founding member of the editorial board of *The Bulletin of Atomic Scientists*, and being a member of the International Council on the Future of the University. Shils recognizes that a unity of concern runs through his many theoretical writings and activities. Early in his life, the concern was expressed as understanding the character of consensus. During the last fifteen years of his life, he refined his understanding of consensus through investigation of the nature of collective self-consciousness. That concern was the structure and character of the moral order of a society and, in particular, liberal democratic society. Accompanying the autobiography are two unpublished essays: *Society, Collective Self-Consciousness, and Collective Self-Consciousnesses* and *Collective Self-Consciousness and Rational Choice*, two areas of intellectual concern discussed in the autobiography. The book contains a fascinating discussion of many of the people Shils knew throughout his illustrious career: Robert Park, Louis Wirth, Talcott Parsons, Karl Mannheim, Michael Polanyi, Audrey Richards, Karl Popper, Robert Merton, and many others. They represent Shils' final formulations on the character of society and its moral order. As such, it is a most important contribution both to the history of the social sciences in the twentieth century and to sociological theory. **SAGE Biographical Research** John Goodwin, 2012-06-25

Biographical research may take a range of forms and may vary in its application and approach, but has the unified and coherent aim of giving voice to individuals. The central concern of this collection is to assemble articles from sociology, social psychology, education, health, criminology, social gerontology, epidemiology, management, and organizational research that illustrate the full range of debates, methods, and techniques that can be combined under the heading of biographical research. Volume One, *Biographical Research: Starting Points, Debates, and Approaches*, explores the different biographical methods currently used while locating these within the history of social science methods. Volume Two, *Biographical Interviews: Oral Histories and Life Narratives*, focuses on the more established interview-based biographical research methods and considers the analytical strategies used for interview-based biographical research. Volume Three, *Forms of Life: Writing, Letters, Diaries, and Auto Biography*, considers the value of data contained within letters, diaries, and auto biography and illustrates how this data has been analyzed to reveal biographies and their social context. Volume Four, *Other Documents of Life: Photographs, Cyber Documents, and Ephemera*, focuses on the other human documents and objects like photographs, cyber documents, emails, blogs, social networking sites, webpages, and other ephemera such as official documents that are used extensively in biographical research. *Max Weber in Politics and Social Thought* Joshua Derman, 2012-10-18 Max Weber is widely regarded as one of the foundational thinkers of the twentieth century. But how did this reclusive German scholar manage to

leave such an indelible mark on modern political and social thought Max Weber in *Politics and Social Thought* is the first comprehensive account of Weber's wide ranging impact on both German and American intellectuals Drawing on a wide range of sources Joshua Derman illuminates what Weber meant to contemporaries in the Weimar Republic and Nazi Germany and analyzes why they reached for his concepts to articulate such widely divergent understandings of modern life The book also accounts for the transformations that Weber's concepts underwent at the hands of migr and American scholars and in doing so elucidates one of the major intellectual movements of the mid twentieth century the transatlantic migration of German thought

**Searchers, Seers, and Shakers** James A. Schellenberg,2017-07-28 This volume offers intellectual portraits of eleven giants of the modern social sciences It is bound by two central themes The first is that there is a fundamental unity behind the various forms of social science There is a general social science as well as a variety of social science disciplines The second theme is that a biographical approach is a useful tool for making clear some of the central ideas of social science By looking at the lives and achievements of selected masters we should be better able to understand the fundamental nature or natures of social science In order to determine which figures should be regarded as masters Schellenberg defines the three main kinds of work he sees as central for social science First is the work of basic discovery done by searchers who made especially important contributions to empirical work in the social sciences The persons he selected for special treatment here are Louis Leakey Mary Leakey Margaret Mead and B F Skinner He then considers the work of theory choosing for examination seers who had made especially important theoretical contributions John Dewey Talcott Parsons and Kenneth Boulding Schellenberg next examines those social scientists who worked to seek changes in society These were the shakers or social reformers In Schellenberg's view these come in three main subtypes and he sought to include at least one example of each Gunnar Myrdal and Alva Myrdal as social engineers C Wright Mills as a rebellious social critic and Daniel Patrick Moynihan as one whose contribution was made more directly into the world of politics Schellenberg's exploration of the lives of these eleven masters of twentieth century social science reveals many surprises and ironies While he points out major contributions he also has

felt free to make criticisms As he has said These were all real persons with failings and foibles as well as persons of great achievement I felt that the examination of *Democracy in Exile* Daniel Bessner,2018-04-15 In *Democracy in Exile* Daniel Bessner explores the life of Hans Speier one of the most significant figures in the history of U S defense policy Bessner traces Speier s intellectual development from Weimar Germany to the Cold War United States revealing how his European roots shaped the expert driven approach to foreign policymaking that American elites institutionalized during and after World War II A key figure in a transatlantic network of migr policymakers and analysts Speier helped establish novel institutions such as the RAND Corporation that transformed how U S foreign policy was made *Democracy in Exile* highlights how social scientists like Speier left academia to create a military intellectual complex that insulated American decision making from public opinion and that continues to shape U S defense policy today
