Adult Development and Aging Klaus Warner Schaie, James Geiwitz, 1982 This comprehensive book helps readers process a clear picture of adult development and aging with the help and results of intensive scientific research It challenges common stereotypes about this subject matter and interprets the research data into an optimistic yet realistic appraisal of the many problems faced by the elderly in today's society Chapter topics look at independence and intimacy in young adulthood responsibility and failure in the middle years the reintegration or despair of later life research methodology families careers personality development learning and memory intellectual and biological development mental disorders and death and bereavement For individuals who want to view the potential richness of life at all stages and or understand the lives of older adults they may care for *Adult Development and Aging* Diane E. Papalia, Cameron J. Camp, Ruth Duskin Feldman, 1996 Redesigned and thoroughly updated *Adult Development and Aging* clearly and concisely delivers the most current research findings in the field with a writing style that students and instructors applaud Using a topical organization this edition provides a balanced positive perspective on adult dev *Aging and Adult Development in the Developing World* Frank E. Eyetsemitan, James T. Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies The developed world however is experiencing a surge in the elderly population and this has spurred its study There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical psychological and social aspects of aging death and dying and social and public policies Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant *Adult Development and Aging* Susan Krauss Whitbourne, Stacey B. Whitbourne, 2010-10-18 The fourth edition continues to provide psychologists with a fresh and engaging approach to the field of psychology of adult development and aging It focuses on three themes a multidisciplinary approach positive images of aging and the newest and most relevant research Recent articles and updates to the information on demography economics and public policy are presented The Aging in the News feature includes a story of a remarkable achievement by a middle aged or older adult The Assess Yourself boxes are also updated with new questions Psychologists appreciate this mix of examples and discussions that make the material come to life **Handbook of Adult Development** Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both

nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come

McFadden, 1996-10-24. The field of emotions research has recently seen an unexpected period of growth and expansion both in traditional psychological literature and in gerontology. *The Handbook of Emotion, Adult Development and Aging* provides a broad overview and summary of where this field stands today, specifically with reference to life course issues and aging. Written by a distinguished group of contributing authors, the text is grounded in a life span developmental framework while advancing a multidimensional view of emotion and its development and incorporating quantitative and qualitative research findings. The book is divided into five parts. Part One discusses five major theoretical perspectives including biological, discrete emotions, ethological, humanistic, and psychosocial. Part Two on affect and cognition discusses the role of emotion in memory, problem solving, and internal perceptions of self and gender. Part Three on emotion and relationships expands on the role of emotion in sibling and parent-child relationships as well as relationships between friends and romantic partners and the emotional reaction to interpersonal loss across the life span. Part Four on stress, health, and psychological well-being treats issues of stress and coping, religion, personality, and quality of life. The final part on continuity and change in emotion patterns and personality discusses emotion and emotionality throughout the life span. An ideal reference source for professionals across a wide range of disciplines, the text summarizes recent important developments in this fast-growing area of psychology and proposes many new directions for future research. Provides a biopsychological view on emotion in adulthood from a life span context. Presents the new perspective on emotion in older adults actively engaged in emotion self-regulation. Describes the intimate connection between emotion and the structure of personality. Demonstrates a new perspective on what emotion is, its importance across the life span, its connections with cognition, its role in interpersonal relation, and the way it influences both stability and change in adulthood. Illustrates the interpersonal nature of emotion. Provides theoretically based, leading edge research from international authors.
