Computer Networks Signal Processing Pattern Recognition and Artificial Intelligence Electrical Engineering Material Engineering and System Design The conference provided an opportunity for researchers to exchange ideas and application experiences and to establish business or research relations finding global partners for future collaborations The conference program was extremely rich profound and featured high impact presentations of selected papers and additional late breaking contributions *Conducting Research as a Behavior Analyst Practitioner* Dennis H. Reid, Dorothea C. Lerman, 2025-08-04

This book describes how interested practitioners can successfully engage in behavior analytic research during their ongoing work whether functioning as a clinician supervisor consultant or staff trainer Strategies are described in practical terms for selecting topics amenable for research in typical human service agencies planning and implementing applied research procedures and writing papers about research for publication and presentation purposes Common obstacles practitioners often face in incorporating research within their service delivery are also presented along with specific means of overcoming them Such means include for example collaborative processes to ensure sufficient personnel resources to assist with research activities promoting agency support for applied research using existing behavior analytic skills that are relevant for conducting research refining practitioner skills when necessary for research purposes and selecting research methodologies that are most readily applicable within ongoing service delivery Additionally attention is directed to how practitioners can comply with important ethical requirements associated with research involving agency clients and staff An underlying intent is to help interested practitioners initiate complete and publish research that results in significant professional and personal benefits and in turn enhanced quality of work life **CAD-Based Optical Design with Quadoo** Rafael G.

González-Acuña, 2025-03-13 In CAD Based Optical Design with Quadoo we explore how optical design entails evaluating application requirements and creating optical systems specifically engineered to meet the exact needs of optical instruments This extensive system may include optics light sources sensors electronic boards display devices and other components Primarily optical design focuses on determining the shapes positions and materials of lenses and mirrors to ensure the optical system adheres to indicated criteria and specifications To meet specific requirements lens designers must use optical design software as an aid for their challenging task Most of the mentioned optical design programs are based on the idea of a spreadsheet that contains the information on each surface radius thickness materials and position among other parameters This paradigm has its positive aspects and negative aspects But optical design is a field under constant evolution and new ways to design optical systems are emerging In this book we are going to construct optimize and analyze optical systems under the fresh paradigm of Computer aided design CAD with the help of Quadoo Optical CAD a novel optical design software Within the chapters of the book we are going to see why this paradigm can be very useful in designing optical systems in comparison with the one proposed by spreadsheets The purpose of this book is to teach optical design with a fresh and reliable tool Quadoo Optical CA This book mixes the classical books in optical design and a manual of Quadoo Optical

CAD The purpose of this blend is to give readers enough knowledge to start a practical optical design with solid theory and robust tools in Quadoa Optical CAD **Modern Risk Quantification in Complex Projects** Yuri G. Raydugin,2020-07-16

Project practitioners and decision makers complain that both parametric and Monte Carlo methods fail to produce accurate project duration and cost contingencies in majority of cases Apparently the referred methods have unacceptably high systematic errors as they miss out critically important components of project risk exposure In the case of complex projects overlooked are the components associated with structural and delivery complexity Modern Risk Quantification in Complex Projects Non linear Monte Carlo and System Dynamics Methodologies zeroes in on most crucial but systematically overlooked characteristics of complex projects Any mismatches between two fundamental interacting subsystems a project structure subsystem and a project delivery subsystem result in non linear interactions of project risks Three kinds of the interactions are distinguished internal risk amplifications stemming from long term chronic project system issues knock on interactions and risk compounding Affinities of interacting risks compose dynamic risk patterns supported by a project system A methodology to factor the patterns into Monte Carlo modelling referred to as non linear Monte Carlo schedule and cost risk analysis N SCRA is developed and demonstrated It is capable to forecast project outcomes with high accuracy even in the case of most complex and difficult projects including notorious projects outliers it has a much lower systematic error The power of project system dynamics is uncovered It can be adopted as an accurate risk quantification methodology in complex projects Results produced by the system dynamics and the non linear Monte Carlo methodologies are well aligned All built Monte Carlo and system dynamics models are available on the book s companion website **Field Materials**
