The Publishers' Circular and General Record of British and Foreign Literature ,1887 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1893 The Publisher ,1901 **Picturing Animals in Britain, 1750-1850** Diana Donald,2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered **The Mind As a Scientific Object** Christina E. Erneling,David M. Johnson,2005-01-13 What holds together the various fields that are supposed to consititute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and son on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about the mind but rather that only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind **The Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1904 Publishers' circular and booksellers' record ,1897 *The Publishers' Circular and Booksellers' Record* ,1907 Report of the Commissioner of Education Made to the Secretary of the Interior for the Year ... with Accompanying Papers United States.
