Animate Earth Science Intuition And Gaia:

Animate Earth Stephan Harding, 2006 Originally published United Kingdom Green Books Ltd 2006 **Animate Earth** Stephan Harding, 2009 This book argues that we need to establish a relationship with the planet as a living entity in which we are indissolubly embedded and to which we are all accountable *Aesth/ethics in Environmental Change* Sigurd Bergmann, Irmgard Blindow, Konrad Ott, 2013 Can aesthetics and ethics be integrated for the good of habitats places and spaces How can the arts widen our perception of nature and deepen environmental ethics Should the political meaning of a landscape be defined solely in terms of its economic and ecological values Questions like these are explored from the angles of arts environmental ethics ecology religious studies theology art history and philosophy The book prompts discussion about the aesthetic and spiritual dimension in the environmental humanities and it offers transdisciplinary insights into the challenge of sustainability and ongoing changes in society and the environment Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 7 **Earthy Realism** Mary Midgley, 2012-07-27 GAIA named after the ancient Greek mother goddess is the notion that the Earth and the life on it form an active self maintaining whole By its use of personification it attacks the view that the physical world is inert and lifeless It has a scientific side as shown by the new university departments of earth science which bring biology and geology together to study the continuity of the cycle It also has a visionary or spiritual aspect What the contributors to this book believe is needed is to bring these two angles together With global warming now an accepted fact the lessons of GAIA have never been more relevant and urgent **The Barbarian Principle** Jason M. Wirth, Patrick Burke, 2013-09-04 Toward the end of his life Maurice Merleau Ponty made a striking retrieval of F W J Schelling s philosophy of nature The Barbarian Principle explores the relationship between these two thinkers on this topic opening up a dialogue with contemporary philosophical and ecological significance that will be of special interest to philosophers working in phenomenology and German idealism **Gaia in Turmoil** Eileen Crist, H. Bruce Rinker, 2010 Essays link Gaian science to such global environmental quandaries as climate change and biodiversity destruction providing perspectives from science philosophy politics and technology **Life in the Hothouse** Melanie Lenart, 2010-05-15 In this insightful compelling and highly readable work Melanie Lenart an award winning journalist and science writer who holds a PhD in Natural Resources and Global Change examines global warming with the trained eye of a professional scientist And she presents the science in a clear straightforward manner Why does the planet s warming produce stronger hurricanes rising seas and larger floods Simple says Lenart The Earth is just doing what comes naturally Just as humans produce sweat to cool off on a hot day the planet produces hurricanes floods wetlands and forests to cool itself off Life in the Hothouse incorporates Lenart s extensive knowledge of climate science including the latest research in climate change and the most current scientific theories including Gaia theory which holds that the Earth has some degree of climate control built in As Lenart points out scientists have been documenting stronger hurricanes and larger floods for many

years There is a good reason for this she notes Hurricanes help cool the ocean surface and clear the air of carbon dioxide the main greenhouse gas responsible for global warming From the perspective of Gaia theory these responses are helping to slow the ongoing global warming and Lenart expounds upon this in a clear and understandable fashion There is hope Lenart writes If we help sustain Earth's natural defense systems including wetlands and forests perhaps Mother Earth will no longer need to rely as much on the cooling effects of what we call natural disasters many of which carry a human fingerprint At a minimum she argues these systems can help us survive the heat

Empirical Nursing Bernie Garrett, 2018-10-26 This

book presents a novel approach to understanding the science and art of nursing that underpins evidence based practice It explores the foundational philosophical principles of nursing in an accessible manner to enable readers to grasp the key arguments behind empirical nursing and why it is important for nurses to understand it

Grounding God Arianne Conty, 2023-12-01 Now that we have entered the Anthropocene the geological age in which humans have altered the natural world to such an extent that nature and culture can no longer be separated the modern dichotomies of mind versus body and culture versus nature have become implausible and need to be replaced In Grounding God Arianne Conty argues that it is in the field of religion where we can find a new ontology better suited for the Anthropocene Conty calls this new religious ontology the grounding of the sacred in that it seeks to deconstruct the binaries of modernity and provide in their place a revalorization of the immanent earth and the more than human beings that inhabit it Such a grounding of the sacred is a potent means to overcome the exploitation and desecration of the earth and its nonhuman beings and to provide in its stead an inclusive cosmopolitics that extends mind into matter and culture into nature Tracing such a grounding in the Christian Buddhist neopagan and animist traditions Conty seeks to elaborate an interdisciplinary ecosophy one that uses philosophy anthropology and religious studies to provide new values for the present age

After the Human Mark C.

Taylor, 2025-02-18 The world is on fire and time for avoiding impending disaster is rapidly running out This catastrophe has deeply entrenched foundations a belief in human exceptionalism and human mastery over the Earth Accelerating technological changes ranging from genetic engineering synthetic biology and nanotechnology to biobots neuroprosthetics and artificial intelligence are creating new worlds in which human beings will either be radically transformed or become extinct After the Human is an ambitious and audacious grand synthesis that weaves together philosophy theology quantum mechanics relativity theory information theory ecology plant and animal cognition and artificial intelligence to forge a new philosophical vision for the future Mark C Taylor calls for replacing human exceptionalism with a theory of radical relationalism an account of the world in which everything is interrelated and codependent People in this telling are not isolated individuals separated from each other and set apart from the complex world they are destined to dominate but integral parts of a vital web where differences enrich each other and nourish the greater whole Ranging from the grounded worlds of dirt and soil to the most abstract realms of quantum ecology After the Human reveals the alternative intelligences

and transformative possibilities that provide hope for life beyond our perilous moment *Customer Experiences with Soul: A New Era in Design* Simon Robinson, Maria Moraes Robinson, 2017 This pioneering book explains how a whole organisation can come together to evolve an entirely new way of being in the world It introduces the Holonomic Circle a new tool which provides a holistic framework for designers corporate executives creative leaders and those starting a new business or initiative to explore the principles underlying the dynamics of soulful customer experiences The insights from the authors will help you take a radically new approach to customer experience design fully integrate purpose goals and strategy with customer experience implement human values across the whole organisation and develop long term and more meaningful relationships with your customers *Customer Experiences with Soul A New Era in Design* provides the guidance needed for developing structuring and implementing customer experiences with soul helping you to build and grow authentic businesses and organisations which honour what it is to be human in our world *Earthly Things* Karen Bray, Whitney

Bauman, 2023-10-03 Globalization and climate weirding are two of the leading phenomena that challenge and change the way we need to think and act within the planetary community Modern Western understandings of human beings animals and the rest of the natural world and the subsequent technologies built on those understandings have thrown us into an array of social and ecological crises with planetary implications *Earthly Things Immanence New Materialisms and Planetary Thinking* argues that more immanent or planetary ways of thinking and acting have great potential for re thinking human technology animal Earth relationships and for addressing problems of global climate weirding and other forms of ecological degradation Older and often marginalized forms of thought from animisms shamanisms and other religious traditions are joined by more recent forms of thinking with immanence such as the universe story process thought emergence theory the new materialisms NM s object oriented ontologies OOO s affect theory and queer theory This book maps out some of the connections and differences between immanent frameworks to provide some eco intellectual commons for thinking within the planetary community with a particular emphasis on making connections between more recent theories and older ideas of immanence found in many of the world s religious traditions The authors in this volume met and worked together over five years so the resulting volume reveals sustained and multifaceted perspectives on thinking and acting with the planet *Lean Logic*

David Fleming, 2016 *Lean Logic* is David Fleming s masterpiece the product of more than thirty years work and a testament to the creative brilliance of one of Britain s most important intellectuals A dictionary unlike any other it leads readers through Fleming s stimulating exploration of fields as diverse as culture history science art logic ethics myth economics and anthropology being made up of four hundred and four engaging essay entries covering topics such as Boredom Community Debt Growth Harmless Lunatics Land Lean Thinking Nanotechnology Play Religion Spirit Trust and Utopia The threads running through every entry are Fleming s deft and original analysis of how our present market based economy is destroying the very foundations ecological economic and cultural on which it depends and his core focus a compelling grounded vision

for a cohesive society that might weather the consequences A society that provides a satisfying culturally rich context for lives well lived in an economy not reliant on the impossible promise of eternal economic growth A society worth living in Worth fighting for Worth contributing to The beauty of the dictionary format is that it allows Fleming to draw connections without detracting from his in depth exploration of each topic Each entry carries intriguing links to other entries inviting the enchanted reader to break free of the imposed order of a conventional book starting where she will and following the links in the order of her choosing In combination with Fleming s refreshing writing style and good natured humor it also creates a book perfectly suited to dipping in and out The decades Fleming spent honing his life s work are evident in the lightness and mastery with which Lean Logic draws on an incredible wealth of cultural and historical learning from Whitman to Whitefield Dickens to Daly Kropotkin to Kafka Keats to Kuhn Oakeshott to Ostrom Jung to Jensen Machiavelli to Mumford Mauss to Mandelbrot Leopold to Lakatos Polanyi to Putnam Nietzsche to N ss Keynes to Kumar Scruton to Shiva Thoreau to Toynbee Rabelais to Rogers Shakespeare to Schumacher Locke to Lovelock Homer to Homer Dixon in demonstrating that many of the principles it commends have a track record of success long pre dating our current society Fleming acknowledges with honesty the challenges ahead but rather than inducing despair Lean Logic is rare in its ability to inspire optimism in the creativity and intelligence of humans to nurse our ecology back to health to rediscover the importance of place and play of reciprocity and resilience and of community and culture Recognizing that Lean Logic s sheer size and unusual structure could be daunting Fleming s long time collaborator Shaun Chamberlin has also selected and edited one of the potential pathways through the dictionary to create a second stand alone volume Surviving the Future Culture Carnival and Capital in the Aftermath of the Market Economy The content rare insights and uniquely enjoyable writing style remain Fleming s but presented at a more accessible paperback length and in conventional read it front to back format

Plants as Persons Matthew Hall, 2011-05-06 Challenges readers to reconsider the moral standing of plants

People, Spaces and Places in Gendered Environments Vasilikie (Vicky) Demos, Marcia Texler Segal, 2024-06-03 Demonstrating how women and other marginalized groups respond to the limits and options imposed by the history and structure of spaces this volume envisions a world beyond colonial able bodied class and patriarchal limitations where freedom of movement functions for all

The Handbook of Contemporary Animism Graham Harvey, 2014-09-11 The Handbook of Contemporary Animism brings together an international team of scholars to examine the full range of animist worldviews and practices The volume opens with an examination of recent approaches to animism This is followed by evaluations of ethnographic cognitive literary performative and material culture approaches as well as advances in activist and indigenous thinking about animism This handbook will be invaluable to students and scholars of Religion Sociology and Anthropology

Mind, Life and Universe Lynn Margulis, Eduardo Punset, 2007-08-15 Nearly forty of the world s most

esteemed scientists discuss the big questions that drive their illustrious careers Co editor Eduardo Punset one of Spain's most loved personages for his popularization of the sciences interviews an impressive collection of characters drawing out the seldom seen personalities of the world's most important men and women of science In *Mind Life and Universe* they describe in their own words the most important and fascinating aspects of their research Frank and often irreverent these interviews will keep even the most casual reader of science books rapt for hours Can brain science explain feelings of happiness and despair Is it true that chimpanzees are just like us when it comes to sexual innuendo Is there any hard evidence that life exists anywhere other than on the Earth Through Punset's skillful questioning readers will meet one scientist who is passionate about the genetic control of everything and another who spends her every waking hour making sure African ecosystems stay intact The men and women assembled here by Lynn Margulis and Eduardo Punset will provide a source of endless interest In captivating conversations with such science luminaries as Jane Goodall James E Lovelock Oliver Sachs and E O Wilson Punset reveals a hidden world of intellectual interests verve and humor Science enthusiasts and general readers alike will devour *Mind Life and Universe* breathless and enchanted by its truths **Anthropologists,**

Indigenous Scholars and the Research Endeavour Joy Hendry, Laara Fitznor, 2012 This collection offers the fruits of a stimulating workshop that sought to bridge the fraught relationship which sometimes continues between anthropologists and indigenous native aboriginal scholars despite areas of overlapping interest Participants from around the world share their views and opinions on subjects ranging from ideas for reconciliation the question of what might constitute a universal science indigenous heritage postcolonial museology the boundaries of the term indigeneity different senses as ways of knowing and the very issue of writing as a method of dissemination that divides and excludes readers from different backgrounds This book represents a landmark step in the process of replacing bridges with more equal patterns of intercultural cooperation and communication **The Self-Creating Universe** J.J. Clarke, 2013-08-22 The Self Creating Universe is a wide ranging attempt to bring science and spirituality together in a philosophical synthesis It opens up to the reader exciting new

developments in the natural sciences while also showing how these contribute to a worldview which addresses fundamental philosophical and social questions The key concept is creativity in both nature and human life Making use of ideas from the history of philosophy and from recent speculations in sciences including cosmology and evolution the book offers bold conjectures about the emergence of new forms of order and self organisation in nature in consciousness and in human life as a whole The book is written in an accessible style which is designed to appeal to both the general reader and to specialists interested in the wider implications of their fields
