A World in One Cubic Foot David Liittschwager, 2012-11-21 Twelve inches by twelve inches by twelve inches the cubic foot is a relatively tiny unit of measure compared to the whole world With every step we disturb and move through cubic foot after cubic foot But behold the cubic foot in nature from coral reefs to cloud forests to tidal pools even in that finite space you can see the multitude of creatures that make up a vibrant ecosystem For *A World in One Cubic Foot* esteemed nature photographer David Liittschwager took a bright green metal cube measuring precisely one cubic foot and set it in various ecosystems around the world from Costa Rica to Central Park Working with local scientists he measured what moved through that small space in a period of twenty four hours He then photographed the cube s setting and the plant animal and insect life inside it anything visible to the naked eye The result is a stunning portrait of the amazing diversity that can be found in ecosystems around the globe Many organisms captured in Liittschwager s photographs have rarely if ever been presented in their full splendor to the general reader and the singular beauty of these images evocatively conveys the richness of life around us and the essential need for its conservation The breathtaking images are accompanied by equally engaging essays that speak to both the landscapes and the worlds contained within them from distinguished contributors such as Elizabeth Kolbert and Alan Huffman in addition to an introduction by E O Wilson After encountering this book you will never look at the tiniest sliver of your own backyard or neighborhood park the same way instead you will be stunned by the unexpected variety of species found in an area so small *A World in One Cubic Foot* puts the world accessibly in our hands and allows us to behold the magic of an ecosystem in miniature Liittschwager s awe inspiring photographs take us to places both familiar and exotic and instill new awareness of the life that abounds all around **Ants** Ann Heinrichs, 2002
