Introducing China Ronald Huisken, 2010-01-01 China's transformation has been patiently methodically and very deliberately constructed by a leadership group that has equally carefully protected its monopoly on power Today's China is proceeding with great seriousness and determination to become a first rank state with a balanced portfolio of power and no major vulnerabilities China takes itself very seriously and is inviting the world to overlook the formidable hard power assets it is determined to acquire in favour of simply enjoying the fruits of its market and trusting in the sincerity of its rhetoric on being determined to become a benign and peaceful new age major power

Geopolitics and Maritime Territorial Disputes in East Asia Ralf Emmers, 2009-09-11 Geopolitics is a crucial element in understanding international relations in East Asia with major and medium powers competing for influence This book examines geopolitics in East Asia focusing in particular on its major contentious maritime territorial disputes It looks in particular detail at the overlapping claims between Japan China and Taiwan over the Senkaku Diaoyu Islands in the East China Sea as well as the Paracel Islands claimed by China Taiwan and Vietnam and the Spratly Islands involving Brunei China Malaysia the Philippines Taiwan and Vietnam in the South China Sea The book offers a comparative study of the East and South China Seas by arguing that their respective circumstances are influenced by similar geopolitical considerations factors such as territory natural resources and power competition all impact on disputes and broader regional relations It is precisely the interplay of these geopolitical forces that can lead to the rapid escalation of a maritime territorial dispute or reversely to a diffusion of tensions The book considers how such disputes might be managed and resolved peacefully despite the geopolitical conditions that can make co operation on these issues difficult to achieve Ralf Emmers examines the prospect for conflict management and resolution by identifying catalysts which may contribute to improving the climate of relations

Malaysia's Foreign Policy Johan Saravanamuttu, 2010 This book captures Malaysia's foreign policy over the first fifty years and beyond since the date of the country's formal independence in 1957 The author provides macro historical narratives of foreign policy practices and outcomes over distinct time periods under the tenures of the five prime ministers One chapter delves into relations with immediate neighbouring states and another chapter analyses the political economy of foreign policy A postscript deals with the transition of foreign policy beyond the fifth decade The concluding chapter suggests that Malaysian middlepowermanship has been in the making in foreign policy practice being particularly evident since the Mahathir years Employing a critical constructivist approach throughout the study the author posits that foreign policy should be appreciated as outcomes of socio political economic processes embedded within a Malaysian political culture In terms of broad policy orientations Malaysian

foreign policy over five decades has navigated over the terrains of neutralism regionalism globalization and Islamism However the critical engagement of civil society in foreign policy construction remains a formidable challenge The Ashgate Research Companion to Ethics and International Relations Patrick Hayden,2016-04-01 While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations IR those writing on topics such as war peace rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature and how issues problems and policies involving ethics are addressed by a variety of actors within the international system This indispensable research companion widens the perspective from ethics and international relations to ethics in international relations redressing the mis perception that ethical concepts principles norms and rules are not in part constitutive of the international system and the agents acting within that system Necessarily cross disciplinary expertise is drawn from IR and also philosophy political theory religious studies history and law making this an ideal volume for any library reference collection **Handbook on Global Governance and Regionalism** Jürgen Rüländ,Astrid Carrapatoso,2022-11-18 This Handbook expertly explores the profound transformations in international relations in recent decades Proliferating cross border challenges including global financial crises climate change environmental degradation irregular migration and COVID 19 require governance structures that transcend the nation state and take both global and regional interplay as well as problem solving capacities into account Contributing authors investigate the effectiveness of international cooperation and performance in a diverse range of policy fields Religion and Conflict in South and Southeast Asia Linell E. Cady,Sheldon W. Simon,2006-09-27 A major new contribution to comparative and multidisciplinary scholarship on the alignment of religion and violence in the contemporary world with a special focus on South and Southeast Asia Religion and Conflict in South and Southeast Asia shows how this region is the site of recent and emerging democracies a high degree of religious pluralism the largest Muslim populations in the world and several well organized terrorist groups making understanding of the dynamics of religious conflict and violence particularly urgent By bringing scholars from religious studies political science sociology anthropology and international relations into conversation with each other this volume brings much needed attention to the role of religion in fostering violence in the region and addresses strategies for its containment or resolution The dearth of other literature on the intersection of religion politics and violence in contemporary South and Southeast Asia makes the timing of this book particularly relevant This book will of great interest to advanced undergraduate and postgraduate students of Asian politics security studies and conflict studies **Bush and Asia** Mark Beeson,2006-09-27 Bringing together a number of recognized international experts this book considers the impact of changes in American foreign policy on the East Asian region as well as the evolving nature of American policy itself Specific case studies consider America s relations with the most important countries of the region

including China a potential strategic rival Japan still the second largest economy in the world and Indonesia the world's largest Muslim country These case studies and others are complemented with more theoretical and thematic considerations of the nature of American hegemony its historical links to the region security policy economic ties and American attitudes toward emerging East Asian regionalism Bush and Asia provides a comprehensive introduction to and analysis of the Bush administration's relations with what will be the twenty-first century's most dynamic and strategically significant region

The Limits of Alignment John D. Ciorciari, 2010-08-16 The Limits of Alignment is an engaging and accessible study that explores how small states and middle powers of Southeast Asia ensure their security in a world where they are overshadowed by greater powers John D Ciorciari challenges a central concept in international relations theory that states respond to insecurity by either balancing against their principal foes bandwagoning with them or declaring themselves neutral Instead he shows that developing countries prefer limited alignments that steer between strict neutrality and formal alliances to obtain the fruits of security cooperation without the perils of undue dependency Ciorciari also shows how structural and normative shifts following the end of the Cold War and the advent of U.S. primacy have increased the prevalence of limited alignments in the developing world and that these can often place constraints on U.S. foreign policy Finally he discusses how limited alignments in the developing world may affect the future course of international security as China and other rising powers gather influence on the world stage

The New US Strategy towards Asia William T Tow, Douglas Stuart, 2014-12-17 Barack Obama's rebalancing or pivot strategy intended to demonstrate continued US commitment to the Asia Pacific region in a variety of military economic and diplomatic contexts was launched with much fanfare in 2011 Implicit in the new strategy is both a focus on China engagement with and containment of and a heavy reliance by the United States on its existing friends and allies in the region in order to implement its strategy This book explores the impact of the new strategy on America's regional friends and allies It shows how these governments are working with Washington to advance and protect their distinct national interests while at the same time avoiding any direct confrontation with China It also addresses the reasons why many of these regional actors harbour concerns about the ability of the US to sustain the pivot strategy in the long run Overall the book illustrates the deep complexities of the United States exercise of power and influence in the region
