Assisted Reproductive Technology Accomplishments And New Horizons:

Assisted Reproductive Technology Christopher J. De Jonge, Christopher L. R. Barratt, 2002-07-11 This text describes the rapid advances that have revolutionized reproductive medicine due to the result of converging and overlapping developments in reproductive biology molecular biology and genetics

Regulating Assisted Reproductive Technologies Amel Alghrani, 2018-11-22 Examines emerging assisted reproductive technologies that will revolutionise the future of human reproduction and their regulation

Born and Made Sarah Franklin, Celia Roberts, 2006-10-30 Are new reproductive and genetic technologies racing ahead of a society that is unable to establish limits to their use Have the new genetics outpaced our ability to control their future applications This book examines the case of preimplantation genetic diagnosis PGD the procedure used to prevent serious genetic disease by embryo selection and the so called designer baby method Using detailed empirical evidence the authors show that far from being a runaway technology the regulation of PGD over the past fifteen years provides an example of precaution and restraint as well as continual adaptation to changing social circumstances Through interviews media and policy analysis and participant observation at two PGD centers in the United Kingdom Born and Made provides an in depth sociological examination of the competing moral obligations that define the experience of PGD Among the many novel findings of this pathbreaking ethnography of reproductive biomedicine is the prominence of uncertainty and ambivalence among PGD patients and professionals a finding characteristic of the emerging biosociety in which scientific progress is inherently paradoxical and contradictory In contrast to much of the speculative futurology that defines this field Born and Made provides a timely and revealing case study of the on the ground decision making that shapes technological assistance to human heredity

The Sperm Cell Christopher J. De Jonge, Christopher Barratt, 2006-04-06 Originally published in 2006 this is a comprehensive and definitive account of the human male gamete The volume summarizes many unique and revealing characteristics of the sperm cell It provides a detailed overview of human sperm production maturation and function and looks at how these processes affect and influence fertility infertility and ART The volume thus provides a detailed review of the most important research and developments augmented with pertinent references This book will appeal to all practitioners and scientists in reproductive medicine and in particular to clinical scientists graduate and post graduate scientists and laboratory personnel

Kinship, Law and the Unexpected Marilyn Strathern, 2005-10-24 How can we hold in the same view both cultural or historical constructs and generalities about social existence Kinship Law and the Unexpected takes up an issue at the heart of studies of society the way we use relationships to uncover relationships Relationality is a phenomenon at once contingent on certain ways of knowing and ubiquitous to social life The role of relations in western Euro American knowledge practices from the scientific revolution onwards raises a question about the extent to which Euro American kinship is the kinship of a knowledge based society The argument takes the reader through current issues in biotechnology new family formations and legal interventions and

intellectual property debates to matters of personhood and ownership afforded by material from Melanesia and elsewhere If we are often surprised by what our relatives do we may also be surprised by what relations tells us about the world we live in

New Horizons in Reproductive Medicine C. Coutifaris, L.
