Asme Selection Guide:

Valve Selection Handbook Peter Smith, R. W. Zappe, 2004-01-24 Valves are the components in a fluid flow or pressure system that regulate either the flow or the pressure of the fluid. They are used extensively in the process industries especially petrochemical. Though there are only four basic types of valves, there is an enormous number of different kinds of valves within each category, each one used for a specific purpose. No other book on the market analyzes the use, construction, and selection of valves in such a comprehensive manner. Covers new environmentally conscious equipment and practices the most important hot button issue in the petrochemical industry today. Details new generations of valves for offshore projects, the oil industry's fastest growing segment. Includes numerous new products that have never before been written about in the mainstream literature. *Standard Handbook of Chains* American Chain Association, 2005-09-20 Since its founding, the American Chain Association (ACA) has set the standard of excellence in developing the chain industry and enhancing the benefit to customers. How to Select the Right Centrifugal Pump Robert X. Perez, 2015-07-30 Choosing a centrifugal pump from the countless options available can be daunting but someone has to make the decision Many factors such as the required flow differential pressure suction conditions etc must be weighed against the capital costs and cost of energy for the pumps considered To determine the right pump you must consider the overall cost of ownership which includes capital cost operating costs and maintenance cost What good is a low cost pump if it is inefficient or if is costly to maintain The selection methodology offered in this book focuses mainly on hydraulic design considerations but it also touches on mechanical design details Analyzing basic pump hydraulic parameters allows you to quickly determine if a centrifugal pump makes sense for your particular application If you do decide a centrifugal pump will work for your application then you need to be able to evaluate the various bids returned by pump manufacturers A complete chapter is devoted to tabulating quotes from pump manufacturers in order to properly evaluate their bids and select the best overall option *Chronicle Financial Aid Guide* ,2005 *Federal Register* ,2012-10
