Assistive Technologies for People with Diverse Abilities Giulio E. Lancioni, Nirbhay N. Singh, 2014-01-07 The familiar image of the disabled tends to emphasize their limitations and reduced quality of life. However, many people with cognitive, motor, and other difficulties also have the capacity to enhance their social interactions, leisure pursuits, and daily activities with the aid of assistive technology. Assistive devices, from the simple to the sophisticated, have become essential to intervention programs for this population. And not surprisingly, the numbers of devices available are growing steadily. *Assistive Technologies for People with Diverse Abilities* offers expert analysis of pertinent issues coupled with practical discussion of solutions for effective support. Its comprehensive literature review describes current and emerging devices and presents evidence-based guidelines for matching promising technologies to individuals. Program outcomes are assessed as are their potential impact on the future of the field. In addition, chapters provide detailed descriptions of the personal and social needs of the widest range of individuals with congenital and acquired conditions, including Acquired brain damage, Communication impairment, Attention and learning difficulties, with special focus on college students, Visual impairment and blindness, Autism spectrum disorders, Behavioral and occupational disorders, Alzheimer's disease, Severe/profound and multiple impairments. The scope and depth of coverage makes *Assistive Technologies for People with Diverse Abilities* an invaluable resource for researchers, professionals, and graduate students in developmental psychology, rehabilitation medicine, educational technology, occupational therapy, speech pathology, and clinical psychology.

Visual Impairment and Blindness Giuseppe Lo Giudice, Angel Catala, 2020-09-09 Blindness and vision impairment affect at least 2.2 billion people worldwide, with most individuals having a preventable vision impairment. The majority of people with vision impairment are older than 50 years; however, vision loss can affect people of all ages. Reduced eyesight can have major and long-lasting effects on all aspects of life, including daily personal activities, interacting with the community, school, and work opportunities, and the ability to access public services. This book provides an overview of the effects of blindness and visual impairment in the context of the most common causes of blindness in older adults as well as children, including retinal disorders, cataracts, glaucoma, and macular or corneal degeneration.
