

The following sketches of the moon's appearance were made over about four weeks. Identify the phases and put them in the correct numerical order. One is labeled for you.

Picture	Order	Phase	Picture	Order	Phase
A 	<u>3</u>	<u>Waning Crescent</u>	D 	<u>4</u>	<u>1st Quarter</u>
B 	<u>1</u>	<u>waning gibbous</u>	E 	<u>5</u>	<u>Waxing Gibbous</u>
C 	<u>6</u>	<u>Full moon</u>	F 	<u>2</u>	<u>Waxing Crescent</u>

#### Page 2 - Introduction to Moon Phases

From the perspective of an observer above the North Pole, the moon moves clockwise / counter-clockwise (circle) in its orbit around the earth.

In the diagram below the sun's light is coming in from the right. The moon's location is marked at several points on its orbit. These are the points the moon was at when the sketches above were drawn. Identify each position with the letter of the corresponding sketch.

It's based on the same time-saving concept. By using children's books to pique students' interest, you can combine science teaching with reading instruction in an engaging and effective way     **Science, Grade 3** Natalie Rompella, 2016-01-04 Interactive Notebooks Science for grade 3 is a fun way to teach and reinforce effective note-taking for students. Students become a part of the learning process with activities about plant and animal adaptations, the human body, matter, force and motion, simple machines, the solar system, and more. This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High interest and hands-on interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color-coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience     **ASVAB STUDY GUIDE & PRACTICE TESTS 2025-2026** Craig T. Constructing Representations to Learn in Science Russell Tytler,Vaughan Prain,Peter Hubber,Bruce Waldrup,2013-04-20  
Constructing Representations to Learn in Science Current research into student learning in science has shifted attention from the traditional cognitivist perspectives of conceptual change to socio cultural and semiotic perspectives that characterize learning in terms of induction into disciplinary literacy practices This book builds on recent interest in the role of representations in learning to argue for a pedagogical practice based on students actively generating and exploring representations The book describes a sustained inquiry in which the authors worked with primary and secondary teachers of science on key topics identified as problematic in the research literature Data from classroom video teacher interviews and student artifacts were used to develop and validate a set of pedagogical principles and explore student learning and teacher change issues The authors argue the theoretical and practical case for a representational focus The pedagogical approach is illustrated and explored in terms of the role of representation to support quality student learning in science Separate chapters address the implications of this perspective and practice for structuring sequences around different concepts reasoning and inquiry in science models and model based reasoning the nature of concepts and learning teacher change and assessment The authors argue that this representational focus leads to significantly enhanced student learning and has the effect of offering new and productive perspectives and approaches for a number of contemporary strands of thinking in science education including conceptual change inquiry scientific literacy and a focus on the epistemic nature of science
