The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser, Ronnie Donaldson, Cecil Seethal, 2016-09-20 **The Geography of South Africa** Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South Spatial Histories of Radical Geography Trevor J. Barnes, Eric Sheppard, 2019-08-05 A wide ranging and knowledgeable guide to the history of radical geography in North America and beyond Includes contributions from an international group of scholars Focuses on the centrality of place spatial circulation and geographical scale in understanding the rise of radical geography and its spread A celebration of radical geography from its early beginnings in the 1950s through to the 1980s and after Draws on oral histories by leaders in the field and private and public archives Contains a wealth of never before published historical material Serves as both authoritative introduction and indispensable professional reference **The Vortex** Frank Uekötter, 2024-04-18 Environmental challenges are defining the twenty first century To fully understand ongoing debates about our current crises climate change loss of biological diversity pollution extinction resource woes means revisiting their origins in all their complexity With this ambitious highly original contribution to the environmental history of global modernity Frank Uekötter considers the many ways humans have had an impact on their physical environment throughout history Ours is not a one way trajectory to sudden collapse he argues but rather death by a thousand cuts The many paths we've forged to arrive in our current predicament from agriculture to industry to infrastructure must be considered collectively if we are to stay afloat in what Uekötter describes as a vortex a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along His book invites us to look at environmental challenges from multiple perspectives including all the twists and turns that have helped to create the mess we find ourselves in Uekötter has written a world history for an age where things are falling apart where we know what lies ahead and are equipped with the right tools technological and otherwise and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order Hyenas of the Limpopo Xolani Tshabalala, 2017-11-03 An increasing number of people today cross the Beitbridge border of South Africa and Zimbabwe This comes with a corresponding growth of creative strategies that seek to aid the crossing of those people and goods that may lack the necessary documentation Such informal border crossings have come to define one of the important economic regions in

Southern Africa the post 1994 Limpopo Valley This thesis approaches routine acts of facilitating undocumented border crossings as an everyday social politics with deep historical roots By use of archival and ethnographic methods the thesis examines the social history and embodied practices of a variety of actors who engage in undocumented border crossings A particular focus is placed on the role of private transporters omalayitsha who represent an important link between an exclusionary and yet fragmentary migration regime and undocumented travellers In three theoretical and four empirical chapters and inspired by border studies as well as the critical realist approach in migration studies the thesis connects border practice to irregular movement and cheap labour within a regional context defined in part by dispossession Through thick interpretations of the lived experience of border practice the study also connects such political economic processes e g migrant irregularity labour precarity and economic informality to questions of social identity and migrant subjectivities By situating the figure of the hyena at the centre of Southern African border struggles the thesis invents an analytical concept that serves both an empirical and a theoretical task Empirically it enables a synthetic understanding of how everyday contestations around the possibility to work across the border for low skill migrants have been interacting through time with broader processes of capital accumulation to partly shape the region s migrant labour system Theoretically it shows how facilitation of undocumented border crossings calls for new sociological models that can account for processes that escape binary classification as formal or informal inclusive or exclusive legal or illegal ordered or disordered thus contributing to a better understanding of the role of migration in the contemporary world Allt fler m nniskor korsar idag gr nsen vid Beitbridge mellan Sydafrika och Zimbabwe Samtidigt sker en motsvarande kning av kreativa strategier som g r att ven personer och varor som saknar r tt handlingar kan ta sig ver gr nsen Dessa informella gr ns verg ngar har kommit att definiera vad som efter 1994 blivit en av de viktigaste ekonomiska regionerna i s dra Afrika Limpopodalen I denna avhandling betraktas rutinerna vid s dana oregistrerade gr ns verg ngar som en vardagens politik med djupa historiska r tter Genom arkivstudier och etnografiska observationer unders ker avhandlingen en samh llshistoria och en m nsklig aktivitet d r en rad akt rer r inblandade i en p g ende pappersl s migration En viktig roll i sammanhanget har omalayitsha dvs privata transport rer som ofta r en viktig l nk mellan de pappersl sa resen rerna och den migrationsregim som ena sidan st nger dem ute och andra sidan r s fragmenterad att de till ts passera igenom I tre teoretiska och fyra empiriska kapitel samt med ett angreppss tt h mtat fr n gr nsstudier border studies och den kritiskt realistiska skolan inom migrationsstudier syftar avhandlingen till att f rst gr ns verg ngens praktik i f rh llande till den irregulj ra mobilitet och det verskott p billig arbetskraft som s tter sin pr gel p en region d r m nga r fattiga och f rdrivna I avhandlingens djuptolkningar av migranternas levda erfarenhet vid gr nsen f rbinds i sin tur de politiskt ekonomiska processerna irregulj r migration prek ra arbetsvillkor och ekonomisk informalitet med fr gor om samh llelig identitet och migrantens subjektivitet Avhandlingen ser hyenafiguren som central f r f rstelsen av de gr nskamper border struggles som utk mpas i s dra Afrika med hyenan introduceras ocks ett analytiskt begrepp Empiriskt sett
