The Wage Curve David G. Blanchflower,Andrew J. Oswald,1994 The Wage Curve casts doubt on some of the most important ideas in macroeconomics labor economics and regional economics According to macroeconomic orthodoxy there is a relationship between unemployment and the rate of change of wages According to orthodoxy in labor economics and regional economics an area s wage is positively related to the amount of joblessness in the area The Wage Curve suggests that both these beliefs are incorrect Blanchflower and Oswald argue that the stable relationship is a downward sloping convex curve linking local unemployment and the level of pay Their study one of the most intensive in the history of social science is based on random samples that provide computerized information on nearly four million people from sixteen countries Throughout the authors systematically present evidence and possible explanations for their empirical law of economics

Waldfogel,2008-10-09 Addressing the disparity in test scores between black and white children remains one of the greatest social challenges of our time Between the 1960s and 1980s tremendous strides were made in closing the achievement gap but that remarkable progress halted abruptly in the mid 1980s and stagnated throughout the 1990s How can we understand these shifting trends and their relation to escalating economic inequality In Steady Gains and Stalled Progress interdisciplinary experts present a groundbreaking analysis of the multifaceted reasons behind the test score gap and the policies that hold the greatest promise for renewed progress in the future Steady Gains and Stalled Progress shows that while income inequality does not directly lead to racial differences in test scores it creates and exacerbates disparities in schools families and communities which do affect test scores Jens Ludwig and Jacob Vigdor demonstrate that the period of greatest progress in closing the gap coincided with the historic push for school desegregation in the 1960s and 1970s

Stagnation came after efforts to integrate schools slowed down Today the test score gap is nearly 50 percent larger in states with the highest levels of school segregation Katherine Magnuson Dan Rosenbaum and Jane Waldfogel show how parents level of education affects children s academic performance as educational attainment for black parents increased in the 1970s and 1980s the gap in children s test scores narrowed Sean Corcoran and William Evans present evidence that teachers of black students have less experience and are less satisfied in their careers than teachers of white students David Grissmer and Elizabeth Eiseman find that the effects of economic deprivation on cognitive and emotional development in early childhood lead to a racial divide in school readiness on the very first day of kindergarten Looking ahead Helen Ladd stresses that the task of narrowing the divide is not one that can or should be left to schools alone Progress will resume only when policymakers address the larger social and economic forces behind the problem Ronald Ferguson masterfully interweaves the volume s chief findings to highlight the fact that the achievement gap is the cumulative effect of many different processes operating in different contexts The gap in black and white test scores is one of the most salient features of racial inequality today Steady Gains and Stalled Progress provides the detailed information and powerful insight we need to understand a complicated past and design a better future

Financial Literacy for Beginners & Dummies Giovanni Rigters,2023-02-16 Financial literacy is crucial for anyone who wishes to achieve financial freedom Managing money and planning our finances for different stages and situations is sensible if we don t want to find ourselves in a mess Those who lack this management or planning skill often end up feeling lost They struggle to pay off their debts and stay on top of their bills Educating yourself in financial knowledge is a life skill necessary to have if you don t want to live your entire life living paycheck to paycheck Even if you manage to make ends meet an emergency such as a medical problem or car crash can dent your pocket Your financial situation can improve drastically when you know how to

budget your money and learn to invest it in the right places Unfortunately financial literacy is not something that we are taught at school Our perception of money is influenced by our upbringing experiences and daily observances This is why many of us cultivate very toxic relationships with money Because financial literacy isn't taught to us like history math or literature we need to take it upon ourselves to enhance our monetary knowledge Taking steps to improve your financial wellness is crucial This is because our financial situation can deeply influence our physical mental and emotional health

Interdisciplinary approaches to literacy and development Kaushik Basu, Bryan Maddox, Anna Robinson-Pant, 2013-09-13

The links between literacy and development have been the focus of research conducted by both economists and anthropologists Yet researchers from these different disciplines have tended to work in isolation from each other This book aims to create a space for new interdisciplinary debate in this area through bringing together contributions on literacy and development from the fields of education literacy studies anthropology and economics The book extends our theoretical understanding on the ways in which people's acquisition and uses of literacy influence changes in agency identity social practice and labour market and other outcomes The chapters discuss data from diverse cultural contexts South Africa Bangladesh India Nepal Peru and Mexico and from contrasting research paradigms The contributors examine the significance of culture and socio-economic contexts in shaping such processes As such they contribute to our understanding of the role of literacy in processes of poverty reduction and its importance to people's capabilities and wellbeing The themes covered include the dynamics of literacy use in the production of agency the enactment negotiation and embodiment of new social identities including gendered and religious identities the impacts of literate identities and use on institutional relations and social participation the dynamics of literacy sharing and their externalities within and beyond households formal analysis of the impacts of proximate illiteracy on labour market and health outcomes across men and women and social contexts This book was published as a special issue of the Journal of Development Studies

Race and Schooling in the South, 1880-1950 Robert A. Margo, 2007-12-01 The interrelation among race schooling and labor market opportunities of American blacks can help us make sense of the relatively poor economic status of blacks in contemporary society The role of these factors in slavery and the economic consequences for blacks has received much attention but the post slave experience of blacks in the American economy has been less studied To deepen our understanding of that experience Robert A Margo mines a wealth of newly available census data and school district records By analyzing evidence concerning occupational discrimination educational expenditures taxation and teachers salaries he clarifies the costs for blacks of post slave segregation A concise lucid account of the bases of racial inequality in the South between Reconstruction and the Civil Rights era Deserves the careful attention of anyone concerned with historical and contemporary race stratification Kathryn M Neckerman

Contemporary Sociology Margo has produced an excellent study which can serve as a model for aspiring cliometricians To describe it as required reading would fail to indicate just how important indeed indispensable the book will be to scholars

interested in racial economic differences past or present Robert Higgs Journal of Economic Literature Margo shows that history is important in understanding present domestic problems his study has significant implications for understanding post 1950s black economic development Joe M Richardson Journal of American History *PCs for Dummies* Dan Gookin,1996 Brings beginning PC users latest information from selecting and setting up your computer system to troubleshooting common PC problems
