Sustainable Climate Action and Water Management Ram Kumar Mishra, R. B. Singh, Anupama Dubey, 2021-04-26 This book discusses various issues relating to water resources, climate change and sustainable development. Water is the main driving force behind three major pillars of sustainable development: environmental, social and economic. As stated in the United Nations Sustainable Development Goals, development of these pillars rests on the availability and management of resources to fulfill the demand for water. By identifying the various challenges in the context of water resources and climate change, the book offers insights into achieving a better and more sustainable future. It provides a unique forum for practitioners and academics to exchange ideas on emerging issues, approaches and practices in the area of water resources, climate change and sustainability while also presenting valuable information for policymakers on the changing contours of water management and climate change mitigation. As such, it is a useful resource for decision makers at the local as well as the global level.
