Regina Harrison,2014-06-01 A central tenet of Catholic religious practice confession relies upon the use of language between the penitent and his or her confessor In the sixteenth and seventeenth centuries as Spain colonized the Quechua speaking Andean world the communication of religious beliefs and practices especially the practice of confession to the native population became a primary concern and as a result expansive bodies of Spanish ecclesiastic literature were translated into Quechua In this fascinating study of the semantic changes evident in translations of Catholic catechisms sermons and manuals Regina Harrison demonstrates how the translated texts often retained traces of ancient Andean modes of thought despite the didactic lessons they contained In *Sin and Confession in Colonial Peru* Harrison draws directly from confession manuals to demonstrate how sin was newly defined in Quechua lexemes how the role of women was circumscribed to fit Old World patterns and how new monetized perspectives on labor and trade were taught to the subjugated indigenous peoples of the Andes by means of the Ten Commandments Although outwardly confession appears to be an instrument of oppression the reformer Bartolom de Las Casas influenced priests working in the Andes through their agency confessional practice ultimately became a political weapon to compel Spanish restitution of Incan lands and wealth Bringing together an unprecedented study and translation of Quechua religious texts with an expansive history of Andean and Spanish transculturation Harrison uses the lens of confession to understand the vast and telling ways in which language changed at the intersection of culture and religion Popular Science ,2004-03 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Advances in Speech and Music Technology* Anupam Biswas,Emile Wennekes,Alicja Wieczorkowska,Rabul Hussain Laskar,2023-01-01 This book presents advances in speech and music in the domain of audio signal processing The book begins with introductory chapters on the basics of speech and music and then proceeds to computational aspects of speech and music including music information retrieval and spoken language processing The authors discuss the intersection in the field of computer science musicology and speech analysis and how the multifaceted nature of speech and music information processing requires unique algorithms systems using sophisticated signal processing and machine learning techniques that better extract useful information The authors discuss how a deep understanding of both speech and music in terms of perception emotion mood gesture and cognition is essential for successful application Also discussed is the overwhelming amount of data that has been generated across the world that requires efficient processing for better maintenance retrieval indexing and querying and how machine learning and artificial intelligence are most suited for these computational tasks The book provides both technological knowledge and a comprehensive treatment of essential topics in speech and music processing *Scientific*
