2014 Bece Time Table:

Junior Graphic Victoria Odoi, 2014-01-29 **Junior Graphic** Mavis Kitcher (Mrs), 2014-03-12 **Daily Graphic** Ransford Tetteh, 2014-09-10 **Community Participation in School Management** Kazuro Shibuya, 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes. However, trust is often eroded, resulting in conflicts, alienation, and differentiation among school-level stakeholders. This book analyses school-based management (SBM) of education through the lens of relational trust in the context of Ghana, revealing how community participation in school management leads to educational outcomes. Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana, Shibuya offers critical insights into building sustainable relationships between individual households and geographical school communities. He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management. The research finds that trust in schools is a two-way mechanism and the mutuality of expectations and obligations among stakeholders is essential if children's learning outcomes are to improve. With its mixed methods approach, this book will be a valuable resource for scholars in comparative education, those in educational development, and those interested in African contexts.

The Economy of Ghana Sixty Years After Independence Ernest Aryeetey, S. M. Ravi Kanbur, 2017 This volume assesses the challenges facing Ghana's economy as it enters its seventh decade and the nation heads towards three quarters of a century of independence.

Primary Mathematics Pedagogy at the Intersection of Education Reform, Policy, and Culture Sarah Murray, Princess Allotey, 2021-11-29 This volume provides an in-depth comparative examination of how primary mathematics education is influenced by national education reform, policy, local resources, and culture in three different countries. By drawing on first-hand observations and interviews as well as analysis of policy documents and learning resources, the book considers the viability of transferring best practices in primary mathematics education across global contexts. Three diverse countries—Ghana, the US, and Singapore—are explored. Similarities and differences are highlighted, and the influence of national and regional initiatives related to pedagogical strategies, teacher education, and cultural expectations are considered to offer an insightful examination of how best practices might be shared across borders. This book will benefit researchers, academics, and postgraduate scholars with an interest in international and comparative education, mathematics, and educational policy. Those with a specialization in primary mathematics education, including pedagogy and teacher preparation, will also benefit from this book.

Africa and the Sustainable Development Goals Maano Ramutsindela, David Mickler, 2019-06-13 The book draws upon the expertise and international research collaborations forged by the Worldwide Universities Network Global Africa Group to critically engage with the intersection in theory and practice of the Sustainable Development Goals (SDGs) and Africa's development agendas and needs. Further, it argues that and demonstrates how the SDGs should be understood as an aspirational blueprint for development with multiple

meanings that are situated in dynamic and contested terrains As the SDGs have substantial implications for development policy and resourcing at both the macro and micro levels their relevance is not only context specific but should also be assessed in terms of the aspirations and needs of ordinary citizens across the continent Drawing on analyses and evidence from both the natural and social sciences the book demonstrates that progress towards the SDGs must meet demands for improving human well being under diverse and challenging socio economic political and environmental conditions Examples include those from the mining industry public health employment and the media In closing it highlights how international collaboration in the form of research networks can enhance the production of critical knowledge on and engagement with the SDGs in Africa

Adaptation to Climate Change and Variability in Rural West Africa Joseph A. Yaro, Jan Hesselberg, 2016-04-12 This book presents conceptual and empirical discussions of adaptation to climate change variability in West Africa Highlighting different countries experiences in adaptation by different socio economic groups and efforts at building their adaptive capacity it offers readers a holistic understanding of adaptation on the basis of contextual and generic sources of adaptive capacity Focusing on adaptation to climate change variability is critical because the developmental challenges West Africa faces are increasingly intertwined with its climate history Today climate change is a major developmental issue for agrarian rural communities with high percentages of the population earning a living directly or indirectly from the natural environment This makes them highly vulnerable to climate driven ecological change in addition to threats in the broader political economic context It is imperative that rural people adapt to climate change but their ability to successfully do so may be limited by competing risks and vulnerabilities As such elucidating those vulnerabilities and sources of strength with regard to the adaptive capacities needed to support successful adaptation and avoid maladaptation is critical for future policy formulation Though the empirical discussion is geographically based on West Africa its applicability in terms of the processes structures needs strategies and recommendations for policy transcends the region and provides useful lessons for understanding adaptation broadly in the developing world
