

Vaccine CPT Codes for Coronavirus Immunizations

On 10th Nov 2020, the American Medical Association (AMA) published an update to the Current Procedural Terminology (CPT®) code set that includes new vaccine-specific codes to report immunizations for the novel coronavirus (SARS-CoV-2).

The CPT editorial panel has approved a unique CPT code for each of two coronavirus vaccines as well as administration codes unique to each such vaccine. These new CPT codes clinically distinguish each coronavirus vaccine for better tracking, reporting, and analysis that supports data-driven planning and allocation.

The response to and cost of meningococcal disease outbreaks in university campus settings

Sean D. Candrilli, Samantha Kiyomi Kurosky, 2019-10-13 Invasive meningococcal disease IMD is a contagious bacterial infection that can occur sporadically in healthy individuals Symptoms are typically similar to other common diseases which can result in delayed diagnosis and treatment until patients are critically ill In the United States IMD outbreaks are rare and unpredictable During an outbreak rapidly marshalling the personnel and monetary resources to respond is paramount to controlling disease spread If a community lacks necessary resources for a quick and efficient outbreak response the resulting economic cost can be overwhelming We developed a conceptual framework of activities implemented by universities health departments and community partners when responding to university based IMD outbreaks Next cost data collected from public sources and interviews were applied to the conceptual framework to estimate the economic cost both direct and indirect of a university based IMD outbreak We used data from two recent university outbreaks in Oregon as case studies Findings indicate a university based IMD outbreak response relies on coordination between health care providers insurers university staff media government and volunteers along with many other community members The estimated economic cost was 12.3 million inclusive of the cost of vaccines 7.35 million Much of the total cost was attributable to wrongful death and indirect costs e.g. productivity loss resulting from death Understanding the breadth of activities and the economic cost of such a response may inform budgeting for future outbreak preparedness and development of alternative strategies to prevent and or control IMD
