Atlas of Sinonasal Tract Pathology Deepali Jain, Justin A. Bishop, 2023-03-01. This book reviews normal anatomy and immunohistochemical profile of sinonasal tract (SNT) and covers histomorphology of infections, some of which are unique to Asia, tumor-like lesions and rapidly evolving spectrum of benign and malignant tumors of SNT. It describes all the entities with the help of over 200 full color photomicrographs with their detailed descriptions. The book includes relevant clinical and radiology photographs and anatomical drawings complemented by short bulleted legends describing the picture and providing relevant information. In addition to surgical pathology, it includes a chapter on the cytology of SNT lesions, which is described rarely in available books and literature. It serves as a concise and informative resource for easy understanding. The book is written by leading experts in pathology around the world from USA, Europe and Asia. It highlights the expanded role of pathologists in patient care of SNT lesions. This book is suitable for clinicians, practicing pathologists, faculty, pathology residents and students. This will help the postgraduate students in pathology to understand this area in detail and to be able to answer questions on SNT resection biopsy cases asked in their board exams of residency.

Cranial, Craniofacial and Skull Base Surgery Paolo Cappabianca, Luigi Califano, Giorgio Iaconetta, 2010-11-01. The fruits of Reinvention Surgery related to the human head, its compartment and contents, have been reinvented over the past 40 years. A number of instruments, most notably the sophisticated medical imaging device and the operating microscope, have principally fueled this evolution. Along the way, endoscopy and sophisticated navigation capabilities have added to the realization of a unique comprehension of normal and abnormal microanatomy, permitting corridors and manipulations that allow novel strategies for surgery in these highly vital functional areas. Cappabianca, Califano and Iaconetta have created a detailed and fully modern review of methods and strategies related to complex surgery and therapies associated with this robust reinvention. Technical innovations abound. Distinguished practitioners of these unique developments in the history of surgical enterprise present these amazing technical exercises. The catalog of these approaches, instrumentation, techniques, strategies and manipulations is inspiring and stands as a testimony to the remarkable progress that we have witnessed in recent decades. The presentation is truly modern and represents in many aspects pinnacles of operative achievement. We must ask ourselves: what will be next? Los Angeles, November 2009. Michael L. J. Apuzzo, M.D., Ph.D., hon.
