Research in Architecture and Landscape. Its application in academic teaching and professional practice García-Hípola, Mayka, 2021-05-31 The title of this book pays homage to Vittorio Gregotti's *The Territory of Architecture* but substituting the word territory for the word landscape because the latter is a more personal concept and is related to the perception of the viewer The goal of this book is to show Students and architects how the time devoted to architectural and landscape Design in all the years of our studies and professional life should be deeply related with research The relation between research and teaching and research and practice is present in two complementary disciplines architecture and landscape Therefore the book is organised into three main parts The first is devoted to research and its relation with learning and practicing The second part deals with architecture and its relation with research And the third is about landscape and its relation with the two previous parts The title of each one of them is preceded by the particle which not only means at but also around studying these disciplines not only from its own autonomy but also from other parallel discourses

Brown, Michael Chapman, 2024-10-28 The intersection of architecture and the machine has a history that stretches back to the Industrial Revolution however the machine has recently begun to appear in new ways in speculative architectural drawing and modelling This issue of AD considers the influence of the machine as an allegorical device for exploring alternative architectural practices and includes a cross section of viewpoints from emerging and established international practitioners and academics Allegory a technique native to literature provides a critical method through which machine typologies can contribute to deeper architectural narratives offering new lenses for challenging or reassembling conventional modes of thought An allegorical architectural project can unveil a story that enhances our awareness of something important This AD reveals how engagement with the machine as an allegorical device in architectural discourse provides an avenue for architecture to provoke new ideas in response to current environmental

political economic cultural and social issues At the forefront of this discussion it extends the criticality of the topic within the broader spectrum of history theory philosophy allegory and new technologies Contributors Daniela Atencio and Claudio Rossi Peter Baldwin Brian Cantley Kirill Chelushkin Giuliano Fiorenzoli Marissa Lindquist Bea Martin Derek Hales Wes Jones Brian M Kelly Tom Kundig and Caleb White Featured architects and designers Jones Partners Architecture Olson Kundig Adolfo Luis Moure Strangis and Liam Young 21st Century Geography Joseph P.
