European nations building socialism has long been underdeveloped Through extensive macro level research on planning and policy in Hungary Poland Czechoslovakia and other Bloc countries a grand narrative has been framed reconstruction and breakneck industrialization under Soviet tutelage then eventual mismanagement stagnation and crisis leading to collapse This book seeks to explore what socialism actually looked like to those sustaining or enduring it as they faced forward into an unknowable future to assess how and where it did or didn't work and to recount how ordinary people responded to its opportunities and constraints This study will appeal to readers interested in understanding how businesses worked day to day in a planned economy how enterprise practices and technological strategies shifted during the first postwar generation how novice managers and technicians emerged during rapid industrialization how peasants learned to farm cooperatively how organizations improvised and adapted how political purity and practical expertise contended for control and how the controversies and convulsions of the postwar decades shaped a deeply flawed project to build socialism

Multipactor in Accelerating Cavities Valery D. Shemelin, Sergey A. Belomestnykh, 2020-08-10 This book is written by two world recognized experts in radio frequency RF systems for particle accelerators and is based on many years of experience in dealing with the multipactor phenomenon The authors introduce and review multipactor in RF cavities for scientists and engineers working in the field of accelerator physics and technology The multipactor phenomenon of unintended electron avalanches occurs in the RF cavities commonly and quite often is a performance limiting factor The book starts with an Introductory Overview which contains historical observations and brief description of most common aspects of the phenomenon Part I deals with the multipactor in a flat gap It starts with description of the dynamics of electrons derivation of the stability condition and analyzing influence of several factors on the multipactor Then the initial considerations are extended to derive a generalized phase stability and finally a particular case called ping pong multipacting is considered The part one is concluded with a brief review of computer codes used in multipactor simulations Part II is dedicated to the multipactor in crossed RF fields the typical situation in accelerating cavities Two cases of MP are considered a two point multipactor near the cavity equator in elliptical cavities and a one point multipactor Part III describes optimization of the cavity shapes geared toward designing multipactor free structures The book will serve as an importance reference on multipactor for those involved in developing and operating radio frequency cavities for particle accelerators
