Albert Frey Houses 1 And :

Albert Frey House 1 + 2 Slipcase Jennifer Golub, Albert Frey, 1998-09 This monograph showcases two houses architect Albert Frey built for himself in the Southern California desert In keeping with Frey s principles of paralleling the simplicity of nature in his work both houses have a modern aesthetic but are fully incorporated into their natural surroundings **Albert Frey, Architect** Joseph Rosa, 1999-11 Lavishly illustrated with over 200 duotone plates many by noted photographer Julius Shulman Richard Neutra's Miller House Stephen Leet, 2004-04 In 1937 the architect and his sophisticated client produced a masterwork of forward thinking and artful architecture **The Modern Steel House** Neil Jackson, 2016-03-23 This book provides a comprehensive survey of Modern Movement houses constructed with steel frames Arranged chronologically and thematically it traces the development over the last seventy years of steel houses in Europe Australia and the United States with special reference to London Paris Sydney and Los Angeles and to the work elsewhere of Mies van der Rohe Philip Johnson and Jean Prouve Examples of steel houses from around the world demonstrate that steel structures can provide a better quality of life within a cleaner lighter home environment **The Grove Encyclopedia of American Art** Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Albert Frey Houses 1 + 2** Jennifer Golub, 1999-04-01 Albert Frey worked in Le Corbusier s atelier in Paris but he is most closely associated with the 1940s and 1950s desert architecture of Southern California and with the work of architects such as Richard Neutra and John Lautner This exquisitely designed monograph on Albert Frey focuses on two houses he built for himself in Palm Springs California one in 1941 with an addition in 1953 and the other in 1964 Although both houses have a modern aesthetic including glass walls and concrete construction they are fully incorporated into their surroundings in keeping with Frey s principles of paralleling nature in his work This title which was developed in collaboration with Frey himself includes color and duotone photographs commissioned especially for this book The book is exquisitely made and comes in a plastic slipcase *The Palm Springs School: Desert Modernism 1934-1975* Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town s small size The book is the first to fully explore the wide ranging forms this architecture has taken from houses to gas stations hotels to airports banks to restaurants and spas Much more than a resort destination Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between the solutions of architects and designers including notably William F Cody E Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges Their answers addressed questions that still hold urgency How to design sustainably in harsh climates How to use technology efficiently and creatively to meet those challenges How to build affordable and high quality mass produced

housing How to reflect a region's culture economy and distinctive atmosphere Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory Benefitting from the architectural freedoms offered by the remoteness of the California desert designers explored new approaches that we can now identify as central to the Palm Springs School shown here in rich archival and contemporary photography [Encyclopedia of Twentieth Century Architecture](#) R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005

The New Eco-Architecture: Alternatives from the Modern Movement Colin Porteous, 2013-10-11 The New Eco Architecture builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today's green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment

Key Houses of the Twentieth Century Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources *House Out of Factory* John Gloag, Grey Wornum, 2022-10-24 Originally published in 1946 when Britain was facing a post war housing crisis this book dealt with the issue of the factory produced house in being part of the solution for housing people in an affordable manner and a short time scale The book aimed at both lay people and technicians discusses aspects of pre fabricated housing such as comfort standardisation and aesthetics The book is illustrated with 48pp of black and white plates [Current Literature in Agricultural Engineering](#), 1931

Europe Meets America Gaia Caramellino,2016-08-17 An analysis of the New York professional milieu between the Wall Street Crash of 1929 and the aftermath of WWII reveals an unexpected scenario in which diverse branches of technical culture and professional and institutional spheres often overlap and initiatives in the field of architecture are characterised by tensions between designers and technicians which pave the way for issues of architects autonomy responsibility and social roles in the New Deal From an initial portrayal of William Lescaze 1896 1969 as an unconventional figure straddling two continents this book challenges a long established interpretation that sees Lescaze exclusively as promoter of the International Style canons in the United States Moving beyond it this book focuses on the role that the Swiss architect played in defining the main features of New York social housing and in the evolution that marks the encounter between European modernity and an American federal scene still profoundly tied to local conventions From an initially difficult status as an migr to his involvement in decisional processes and bureaucratic organisations Lescaze s professional progress coincides with the gradual acceptance of European forms and models which little by little became part of the institutional language related to public housing which would remain prevalent in New York City until the end of WWII Drawing from yet unpublished archival sources pertaining to two fields housing and architecture which have traditionally been separate in American historiography this book sheds light on many crucial issues in a branch of architecture that is particularly relevant today

Designing the Absent City Luca Trabattoni, 2024-06-27 This book concerns the study of open air accommodation facilities The market evolutions allow us to look at these structures as temporary settlements characterised by a low density dwelling and a close connection with natural elements and the landscape This new and different point of view is sustained by the tendency of outdoor tourism to go in the direction of temporary villages and this tendency is directly related to time and landscape The landscape is the reason why the campsite is settled The time is linked to the holiday season timing Today both are greatly influenced by the introduction of the Maxi Caravan This removable living unit can be placed on the empty pitch occupying the landscape without ruining the soil By the settlement of Maxi Caravans the campsite is transformed from an empty landscape with tents to a temporary settlement whose timing is divided between the seasonal timing of the campsite and the timing of the product and whose landscape is organised by the relation with the prevalent landscape and the internal one The book s core defines the outdoor facility structure using Italy as the main case study To identify design strategies the book analyses temporary settlement examples quick time and projects from historic outdoor tourism medium time Finally the last chapter reflects on open air accommodation facilities by showing their applicability in the different contexts of the

refugee camps long time The aim of this research is to enhance the theme of open air accommodation facilities highlighting the need to equalise the study of temporary settlements with that of permanent settlements It will be of interest to researchers and students of planning landscape and tourism **House documents** ,1895
